

SYNOPSIS

Fuse is the musical about finding your charge. A physicist fights through her education and for the opportunities that follow. Though her mind is valuable for the good of the magnetic paces that follow, dreams do not electrify. So, she may need to reconnect working circuits and disconnect from those that crossed the field lines.

Ruth enters Columbia University as a physics student dreaming of working at an accelerator. The years she had under the teachers of Boltz facilitated a concentration of magnetism. However, there was no attraction between the opposite charges, but an instance of perhaps, identical. Амалия take charge of Ruth's livelihood each time it was cut down by Boltz's power to fail students and even defund institutions. In the conclusion of this musical thesis, Ruth may have the circuits in the end to bring unharnessed electric energy to Brookhaven National Laboratory.
