

SYNOPSIS

Tour is about finding your impact. The matter surrounds a physicist tackling her education and fighting for the prospects that follow. Though her mind values the magnetic paces ahead, dreams do not electrify. So, she may need to reconnect working circuits and disconnect from those that crossed the field lines.

Quark enters the University as a student, dreaming of becoming a physicist. Professor Boson connects her to magnetism. However, their opposite charges never attract but an instance of perhaps, identical. Лептониа takes charge of Quark's livelihood each time Quark gets cut down by Boson; he has the power to fail anyone and even defund institutions. With the introduction of this musical thesis, Quark acquires the circuits to bring unharnessed energy to the Accelerator.

During the act that follows, Quark fulfills what the Accelerator is meant to accomplish. The success ends when Quark reaches supersymmetry during a particle accelerator "accident."
