

# SYNOPSIS

*Fuse* is about finding your charge. The matter surrounds a physicist tackling her education and fighting for the prospects that follow. Though her mind values the magnetic paces ahead, dreams do not electrify. So, she may need to reconnect working circuits and disconnect from those that crossed the field lines.

Ruth enters Columbia University as a physics student dreaming of working at an accelerator. Professor Boltz connects her to magnetism. However, their opposite charges never attract, but an instance of perhaps, identical. Амалия takes charge of Ruth's livelihood each time Ruth gets cut down by Boltz; he has the power to fail anyone and even defund institutions. In the conclusion of this musical thesis, Ruth acquires the circuits to bring unharnessed energy to Brookhaven National Laboratory.
