

Black-filled canvas.

The canvas pans down.

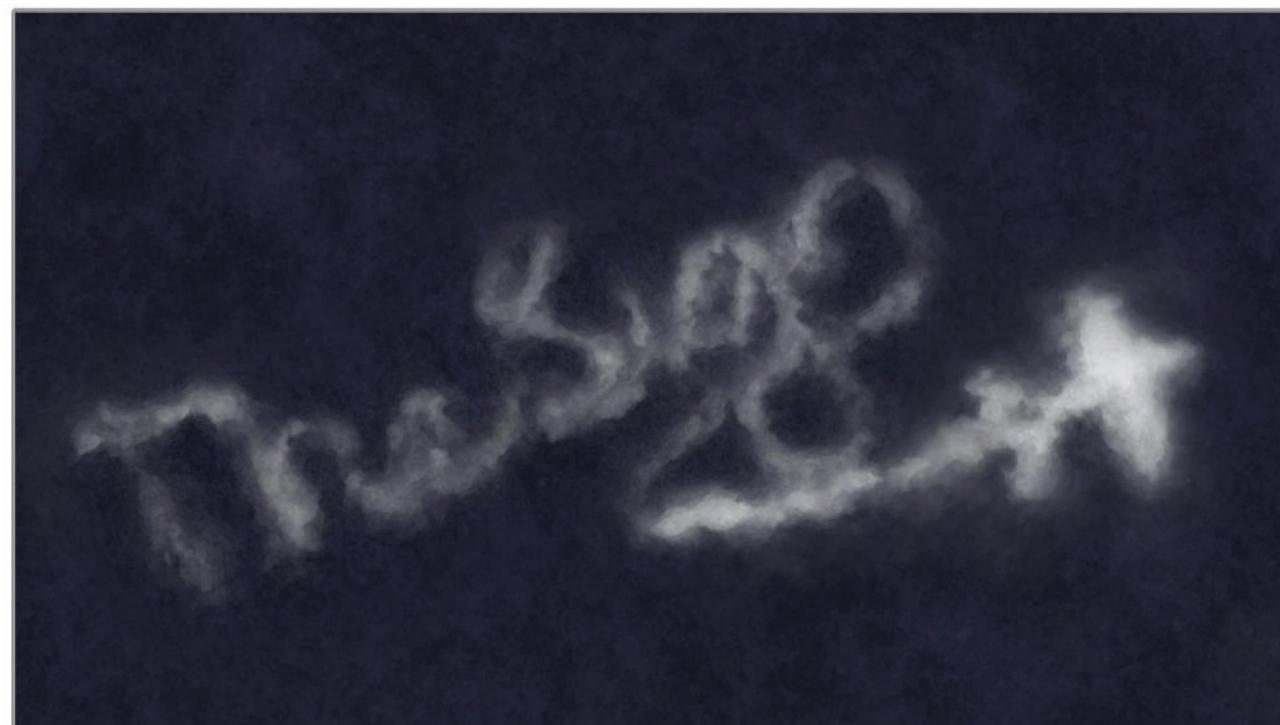

The canvas passes a sketch of papermakers.

Since the dawn of time, we have had a short attention span. We do all we can to help the viewer hold the previous pieces in our lengthy puzzles.

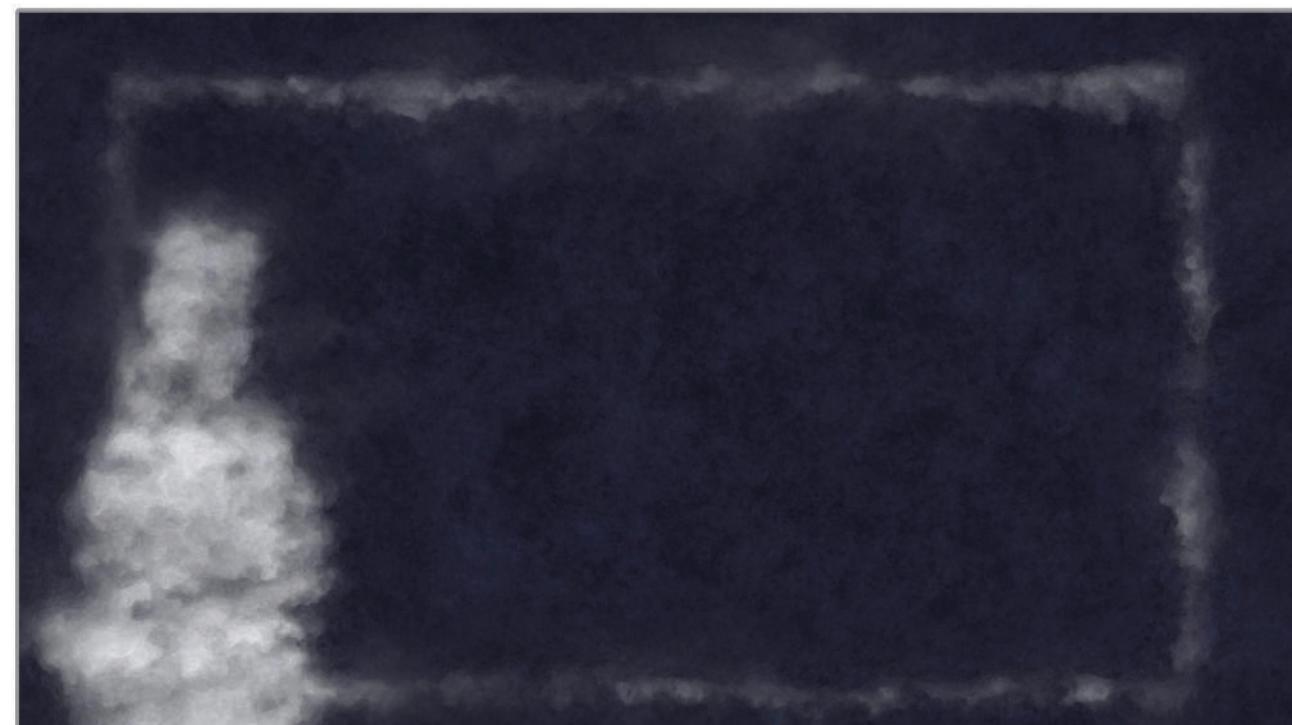

We made sure our pupils remember a prerequisite formula in a daily focus of a branch in our courses...

...from simple posters since papermaking...

Paper-crumpling audio

The canvas passes a sketch of a plane spelling, "The Sign" from its white trail.

The canvas stops at the sketch of the figure with a rectangle.

The canvas focuses on the illustration of ixDavid and the rectangle. **ixDavid** is shaded in.

...to less conventional ways.

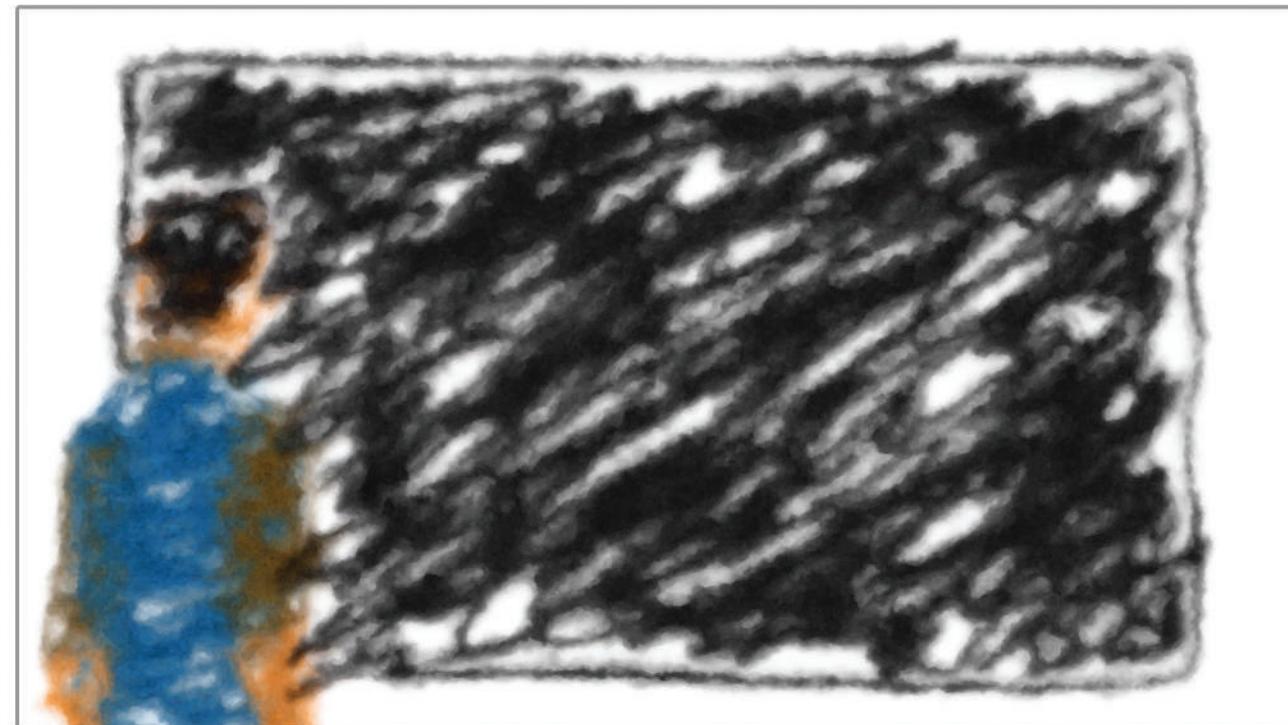

We arrive to the best note-taking tool: the chalk-(cough) -board.

Rapidly, coughing up powder was a thing of the past. The bright whiteboard. An inverted world of the ol' blackboard and hardly visible white chalk. The markers still had the familiar mess...

Crop duster audio

2|3-Functionality

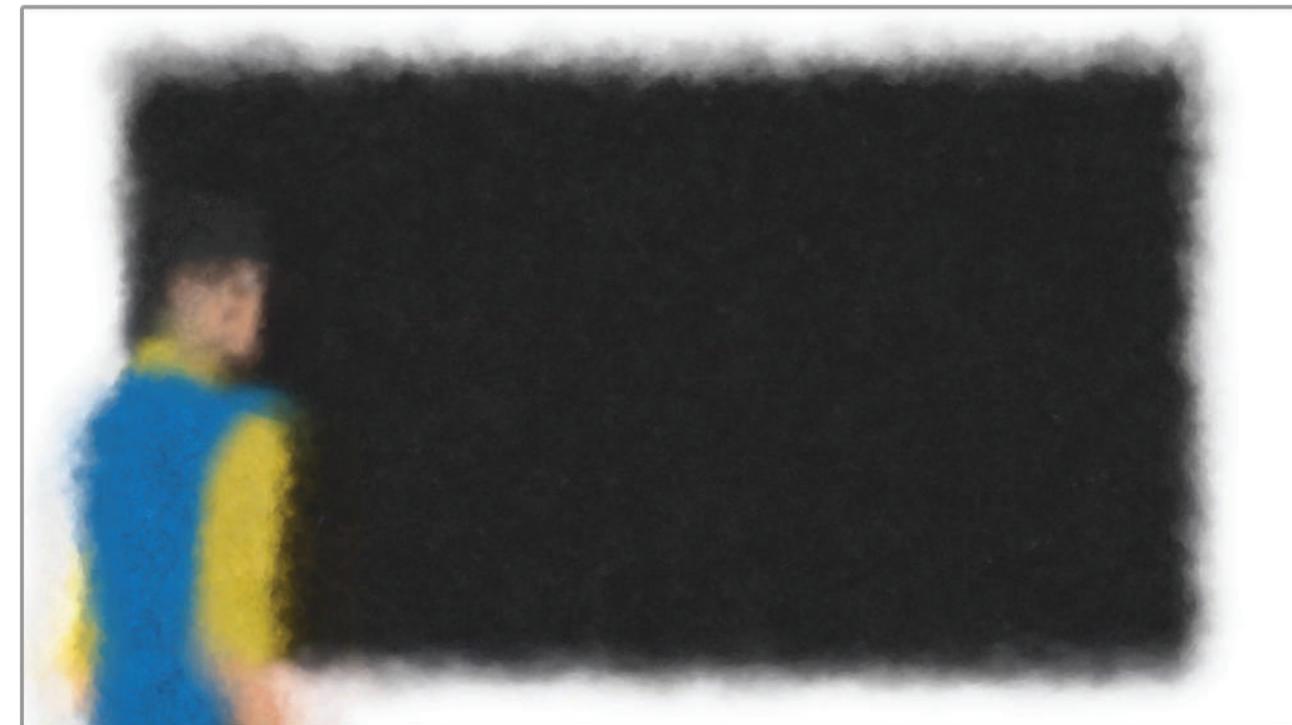

3-Functionality|2

The rectangle is immediately shaded in.

ixDavid faces the technoboard.

ixDavid turns around.

...on your hands. Whip them, then clear your mind.
Let us call upon the spirit of these tools. Let it be
that we need only two essence now. You and the board.

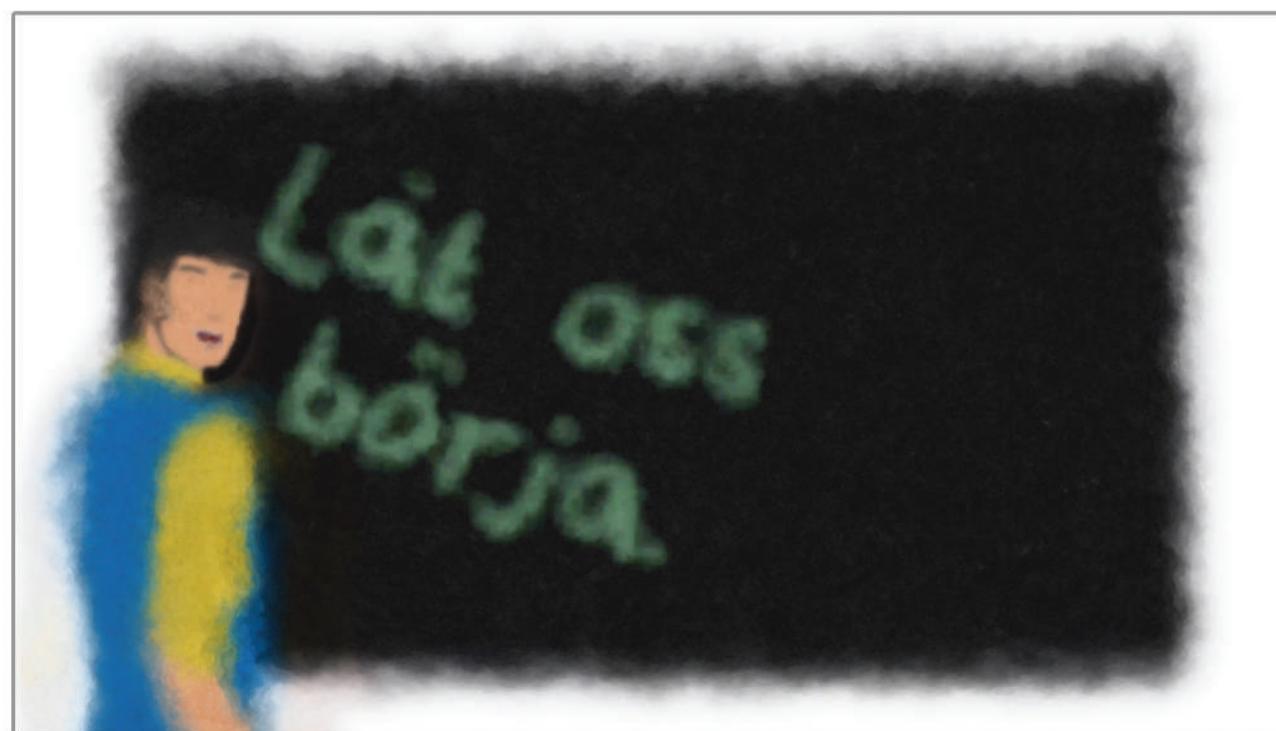

Technoboard.

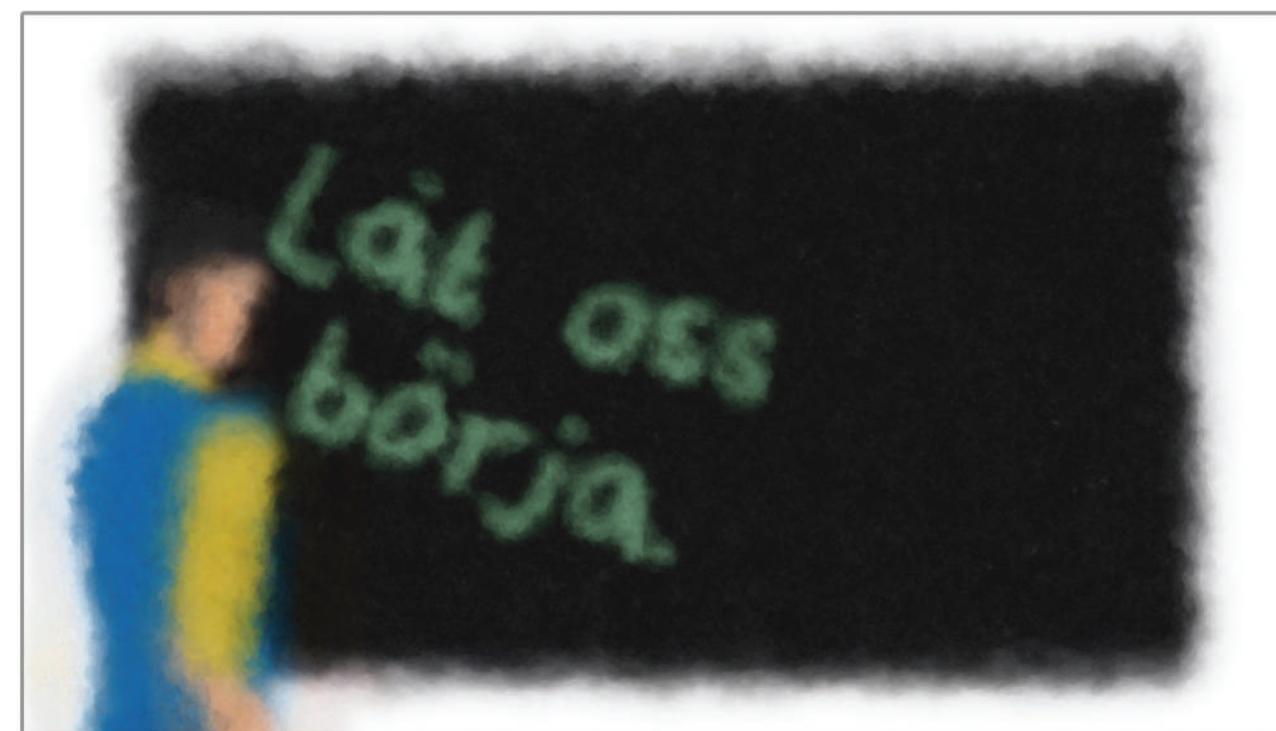

ixDavid blinks.

Låt oss börja.

"Låt oss börja" is immediately written in green on the technoboard.

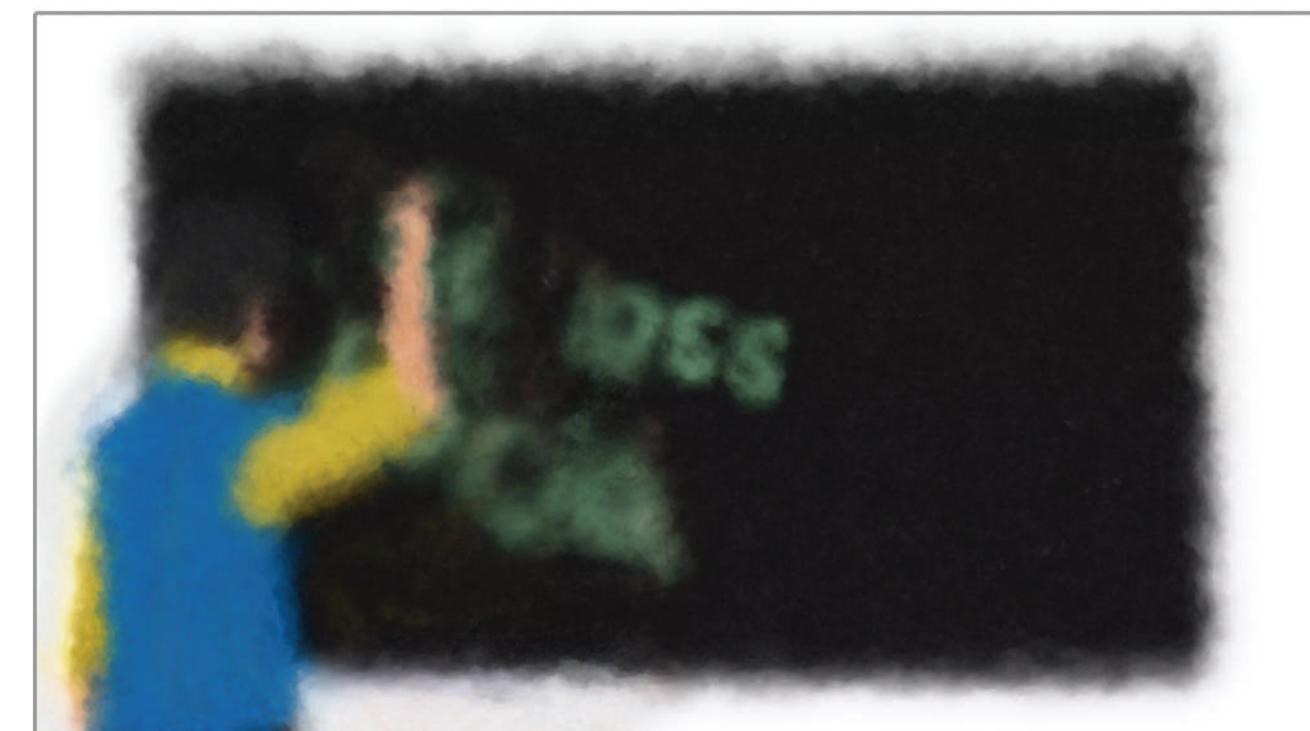

ixDavid turns back around.

Rah-der-ah! Hmm... I got to work on my Swedish. Going to have to do this manually.

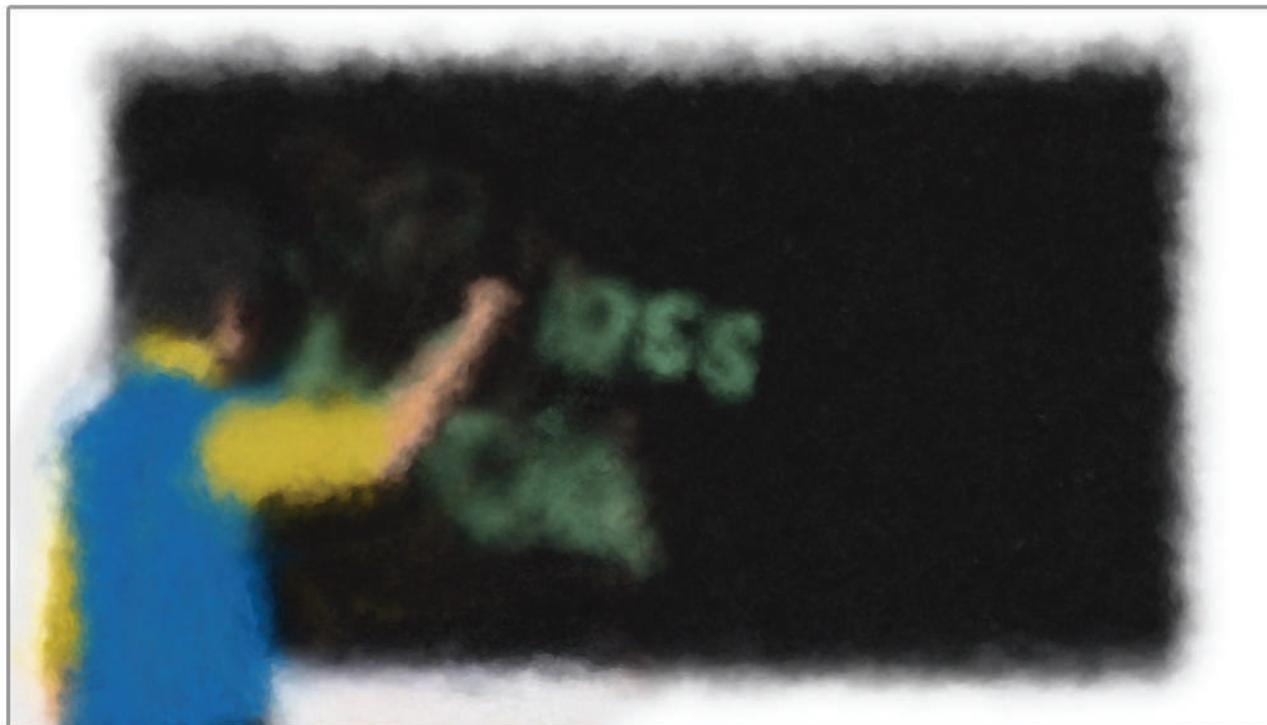

ixDavid swings his right arm above "Låt".

ixDavid erases "Låt".

I swear she works.

ixDavid swings his right arm to the left of "börja".

Thanks to her, I can cut...

ixDavid has his right arm immediately below "oss".
"börja" immediately disappears.

ixDavid turns his head to the right.

...animation.

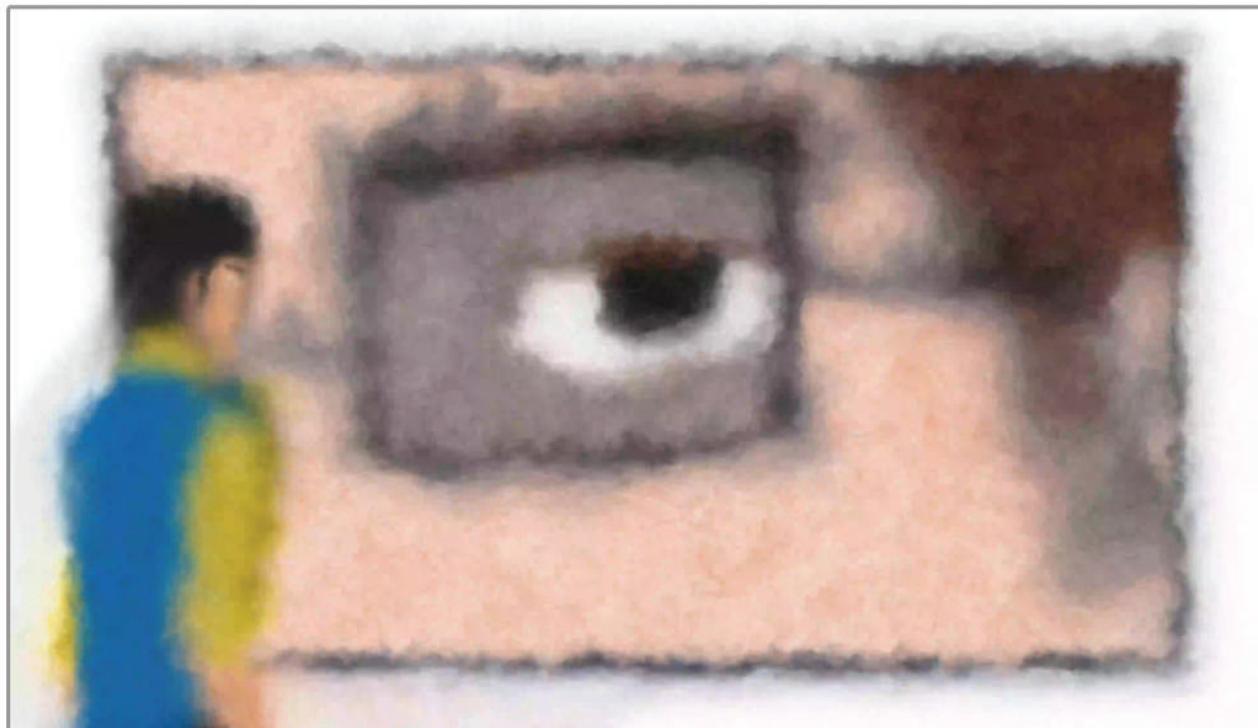

Radera.

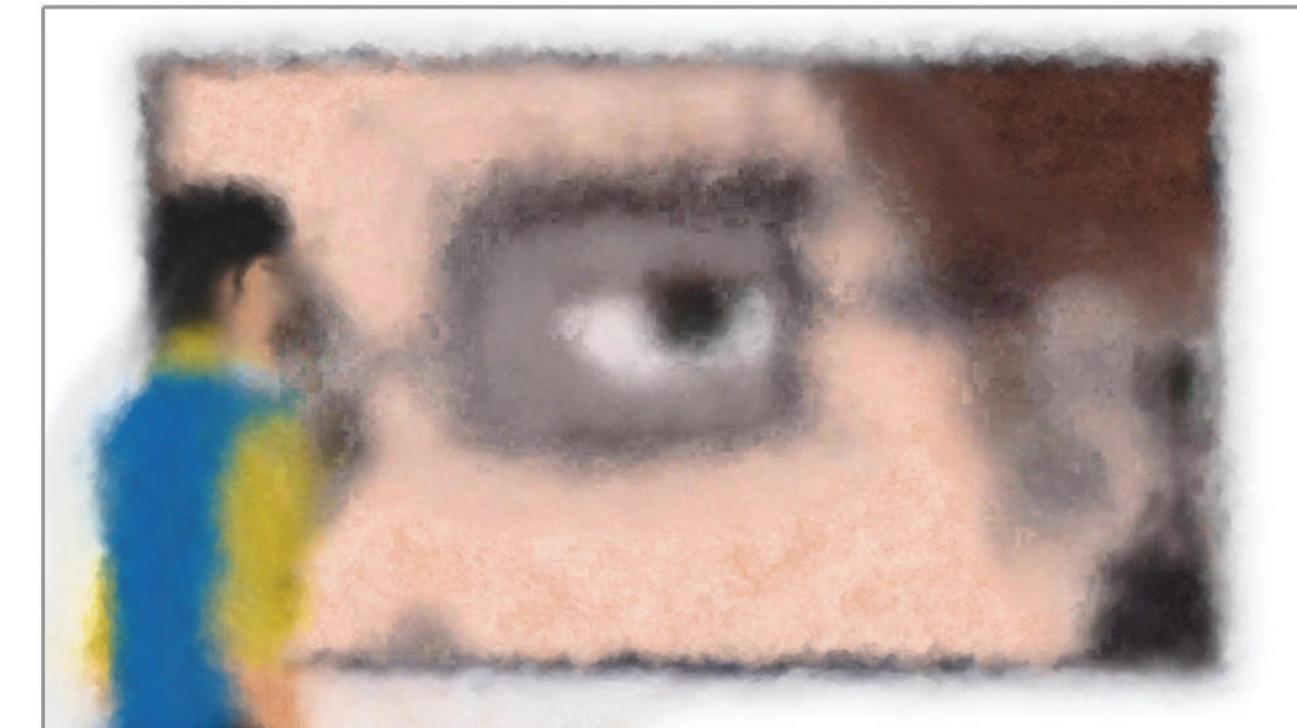

"oss" fades away. **ixDavid** swings arm back to his side.

Here we go.

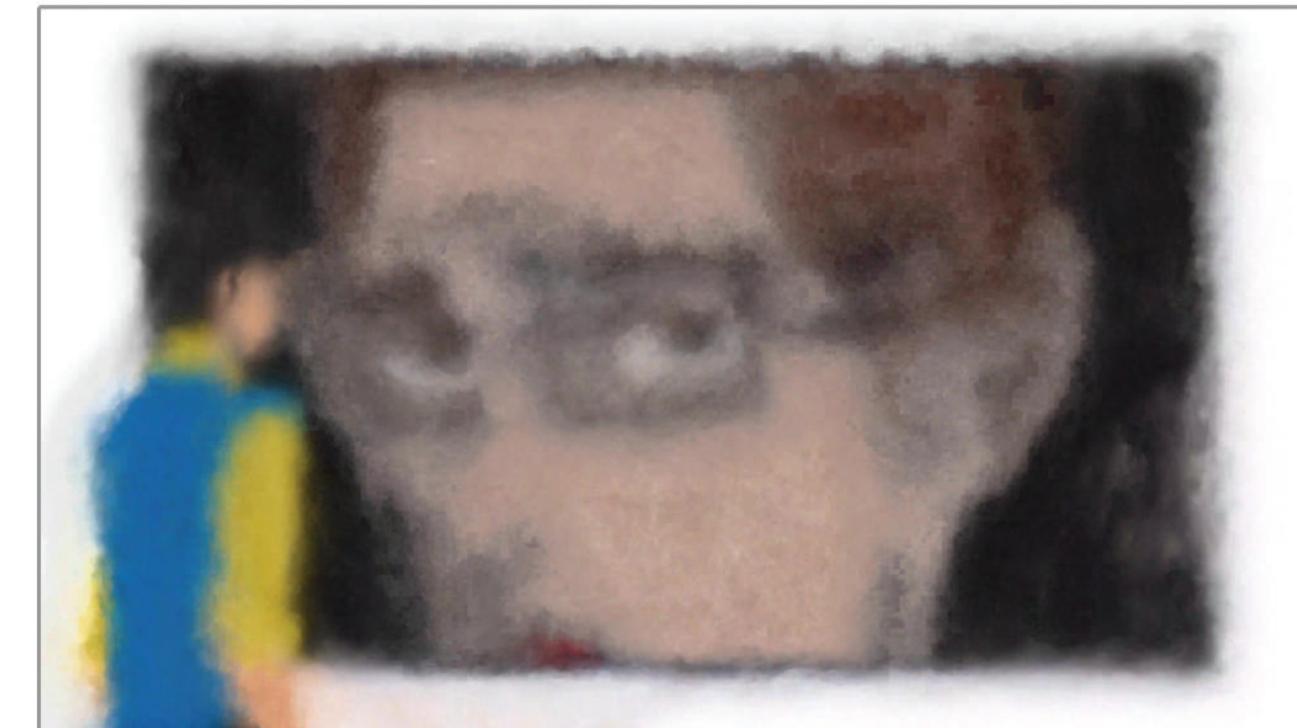

We are going to demonstrate this bad boy by first...

The roommate engulfs the entire technoboard. Only the eyes are visible.

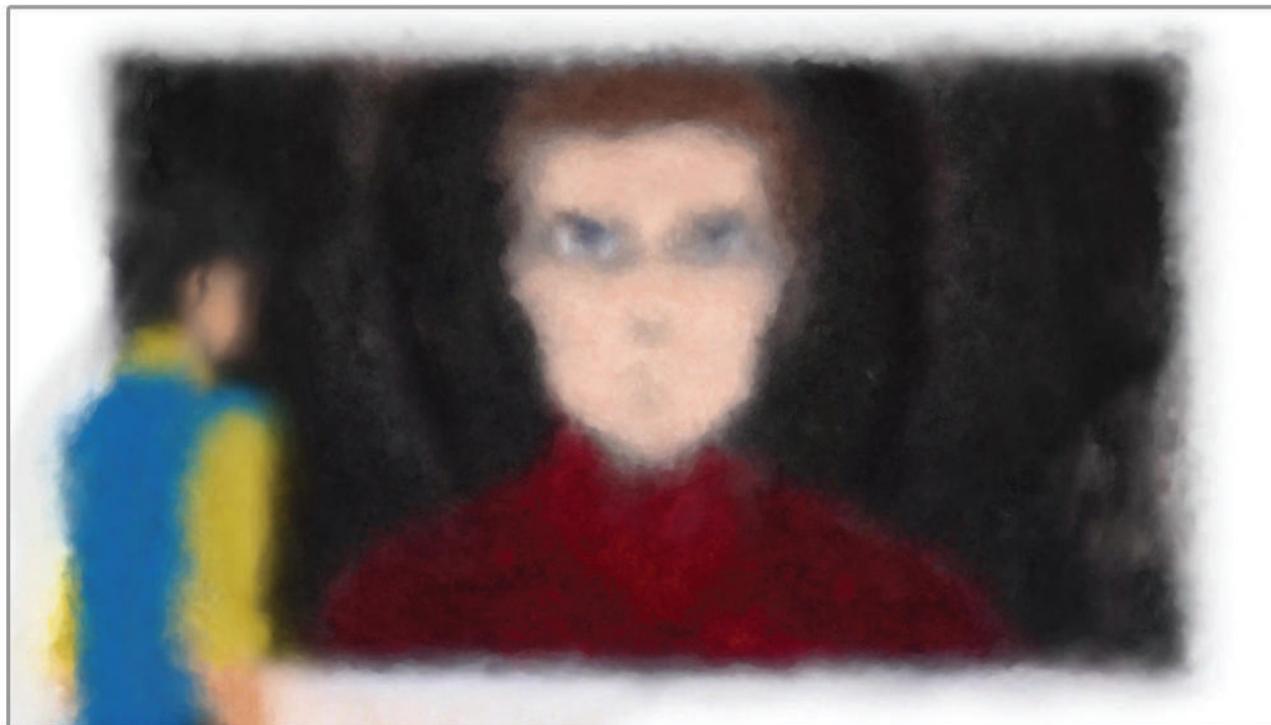

The roommate distances in the technoboard.

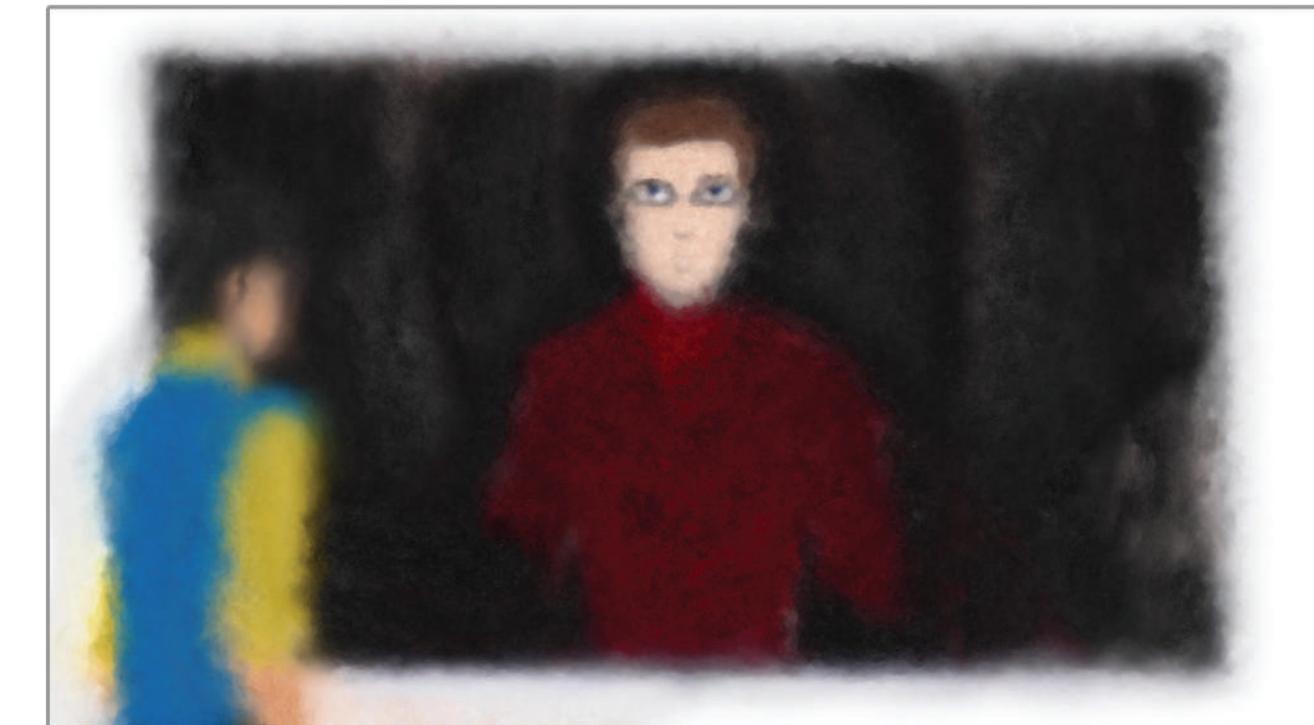

The roommate fades into a distancing head facing towards the canvas.

...complaining about my roommate. He has a hard time cleaning the place. He has a difficult mindset when flipping pancakes. He has...

....dropped dishes into oblivion.

The roommate accelerates the distancing to reveal the torso.

The right arm of the roommate fades away.

He has one arm. Imagine his remaining mauled by another bear, or shark,...

Bear-attack audio

...or whatever he told me. Now, within our attention span, remember how it was voice-activated? It is wondrous what we can do with only the ability to communicate or the sense of touch. It is what we could achieve ahead of advancements in...

Robotic arms fade in to replace the missing arms.

A printer immediately displays on the technoboard.

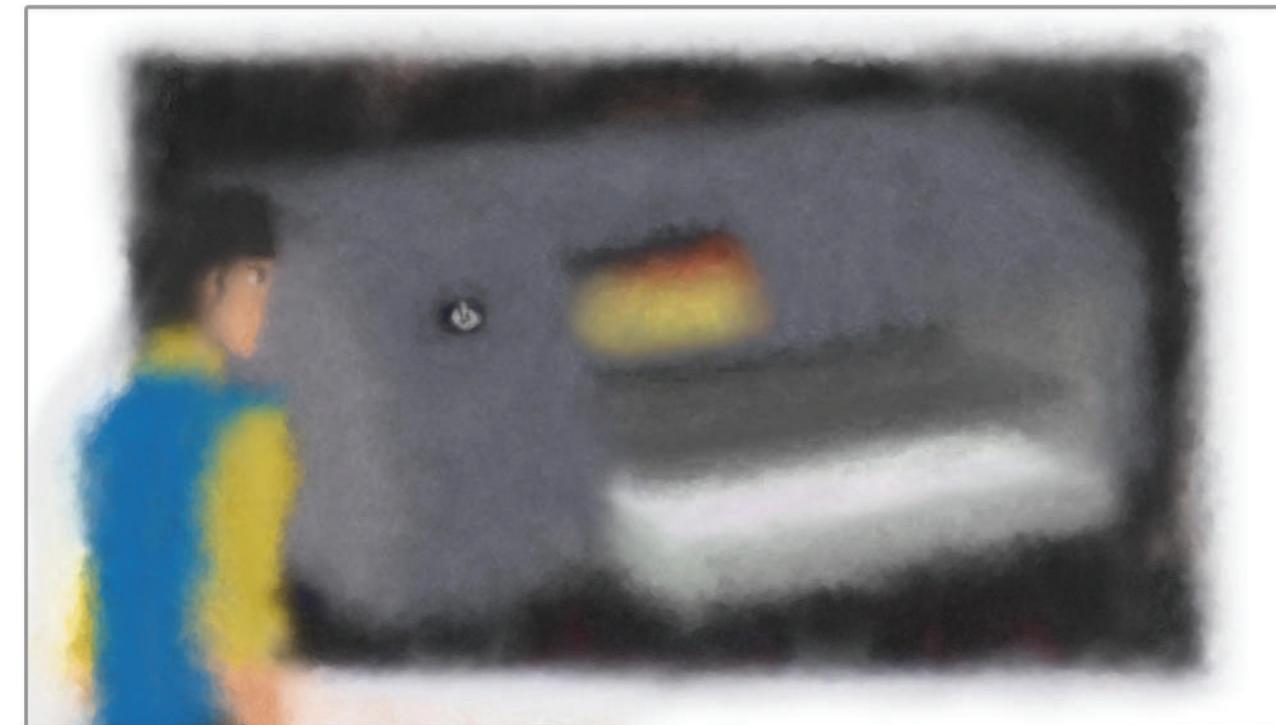

...robotic limbs.

Speaking of which, my other mechanical roommate is also complainable. She can do three tasks. However, she always makes me rush when I need her most. She is the reason why I am never overloading the technoboard with any other job than note-taking and hosting.

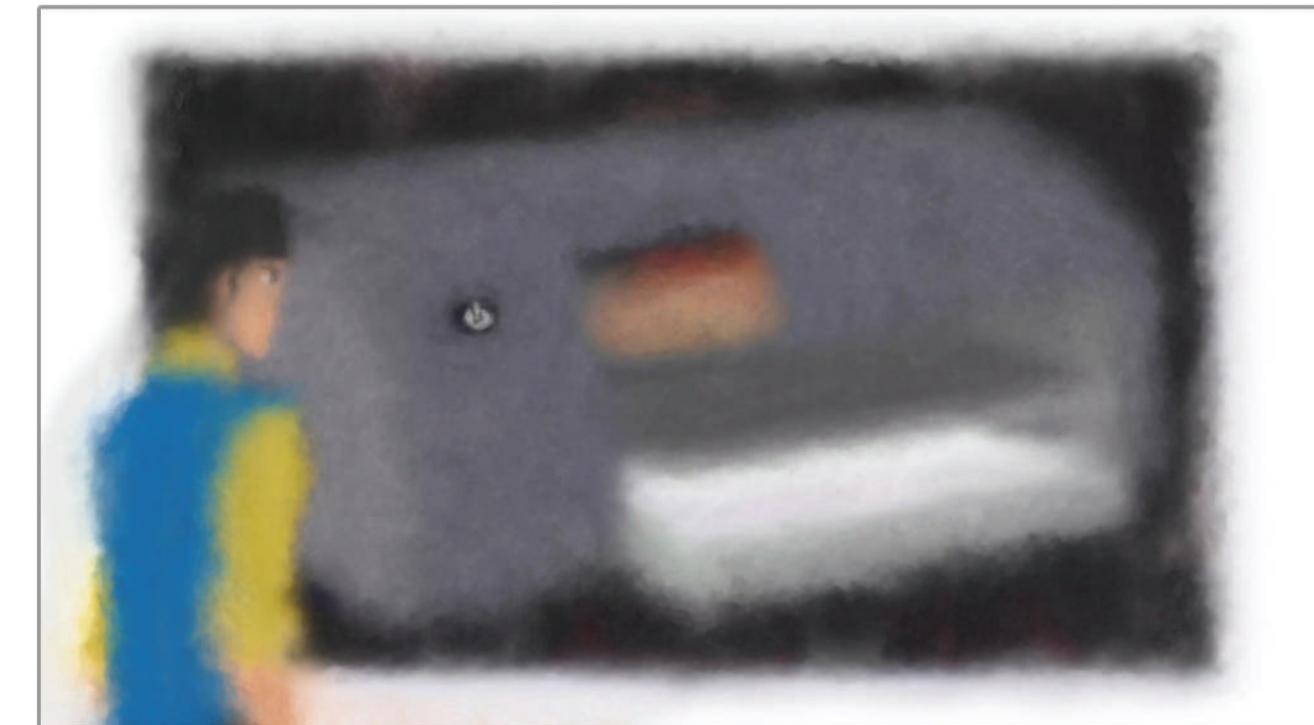

She is a printer.

Fire rises in the touchpad of the printer.

The printer raises her slot up and down.

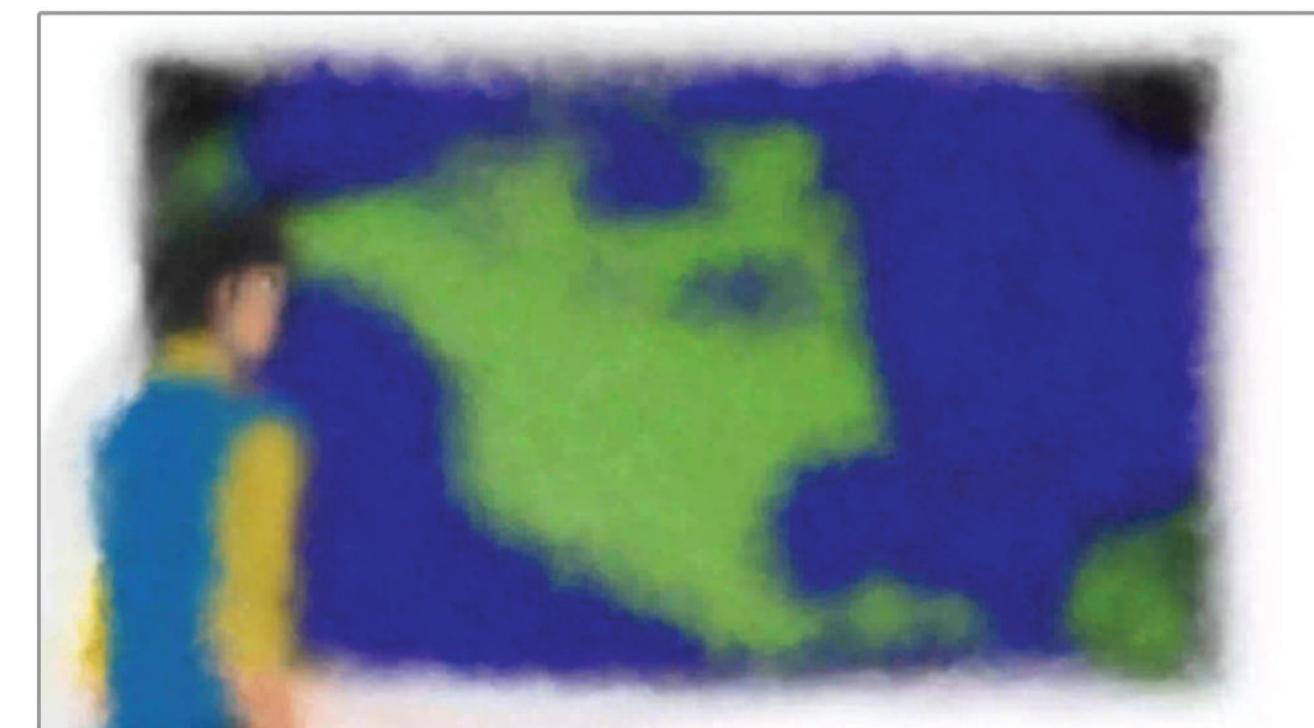

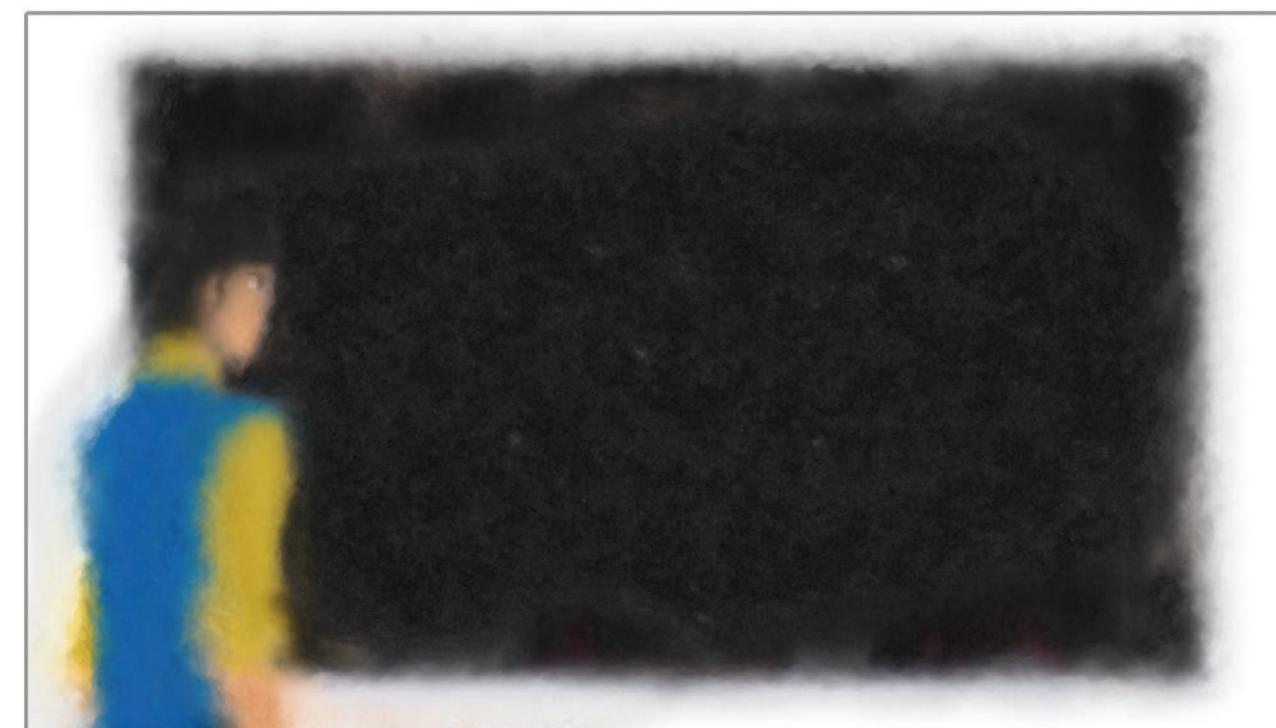

Stäng av.

Robotically evil laughter audio

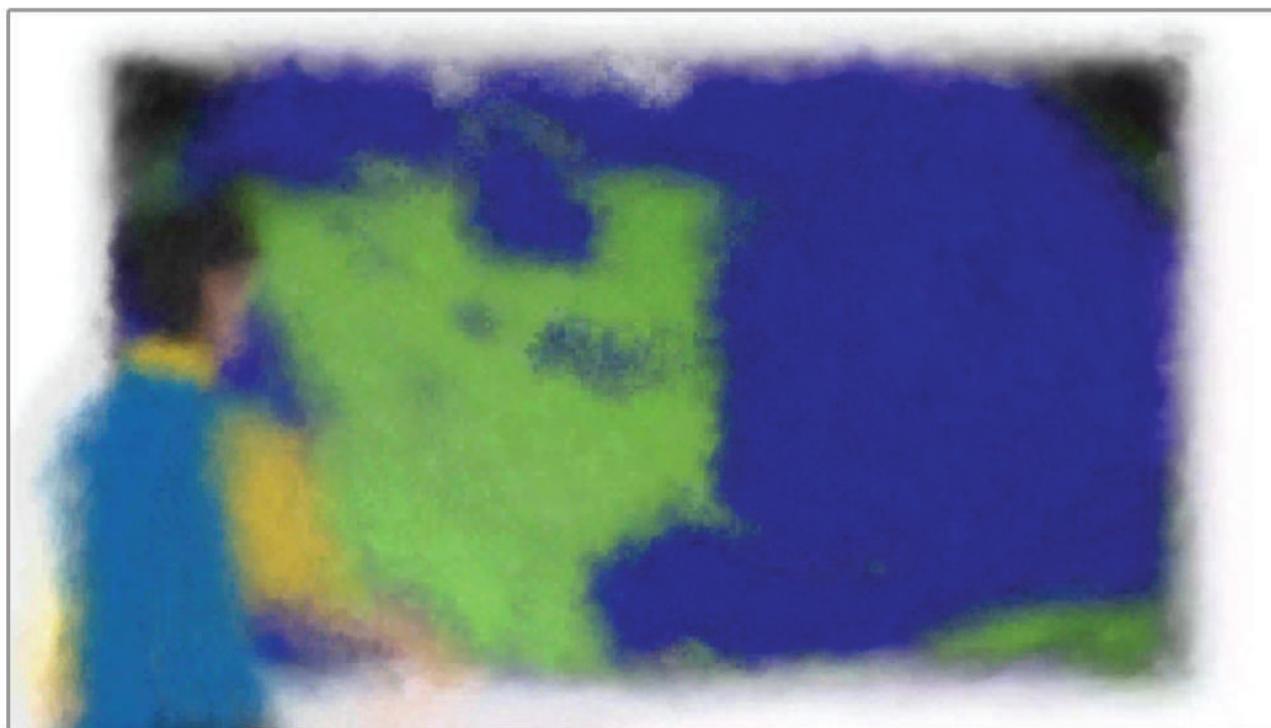

The technoboard turns off.

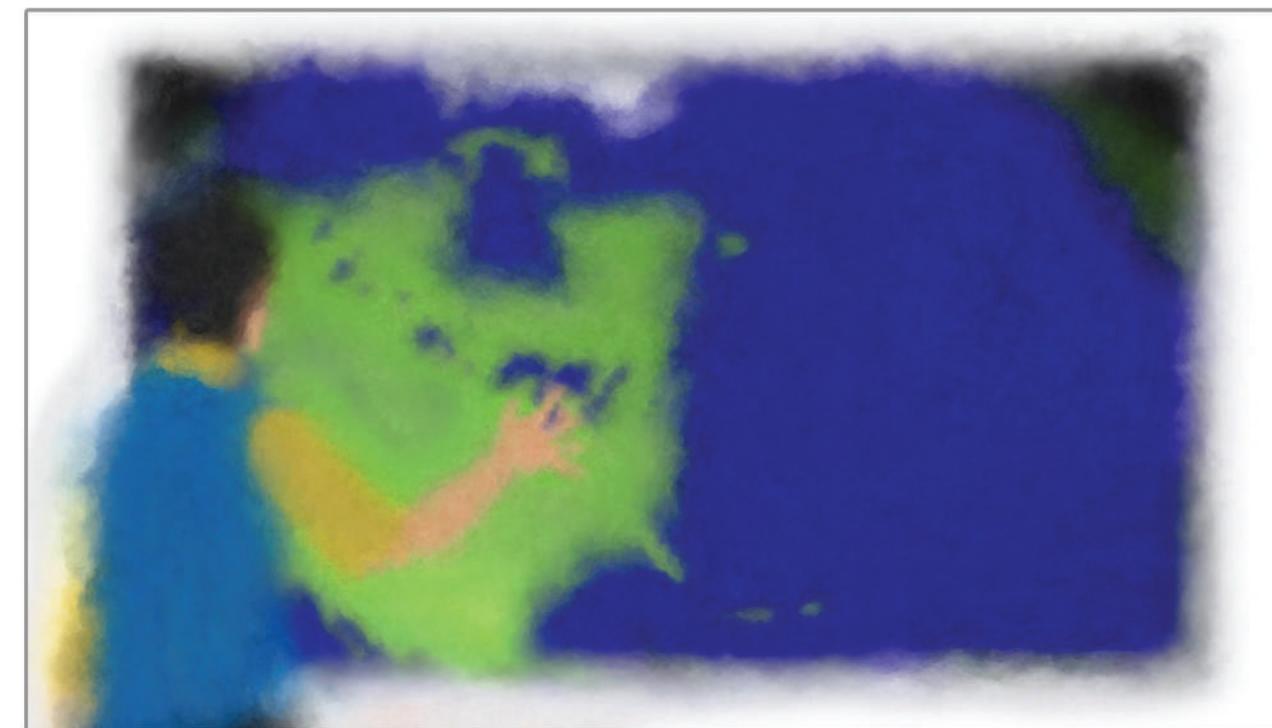

The technoboard turns on. Earth rotate in the opposite direction. North America and the Atlantic Ocean are in view.

Sätta på.

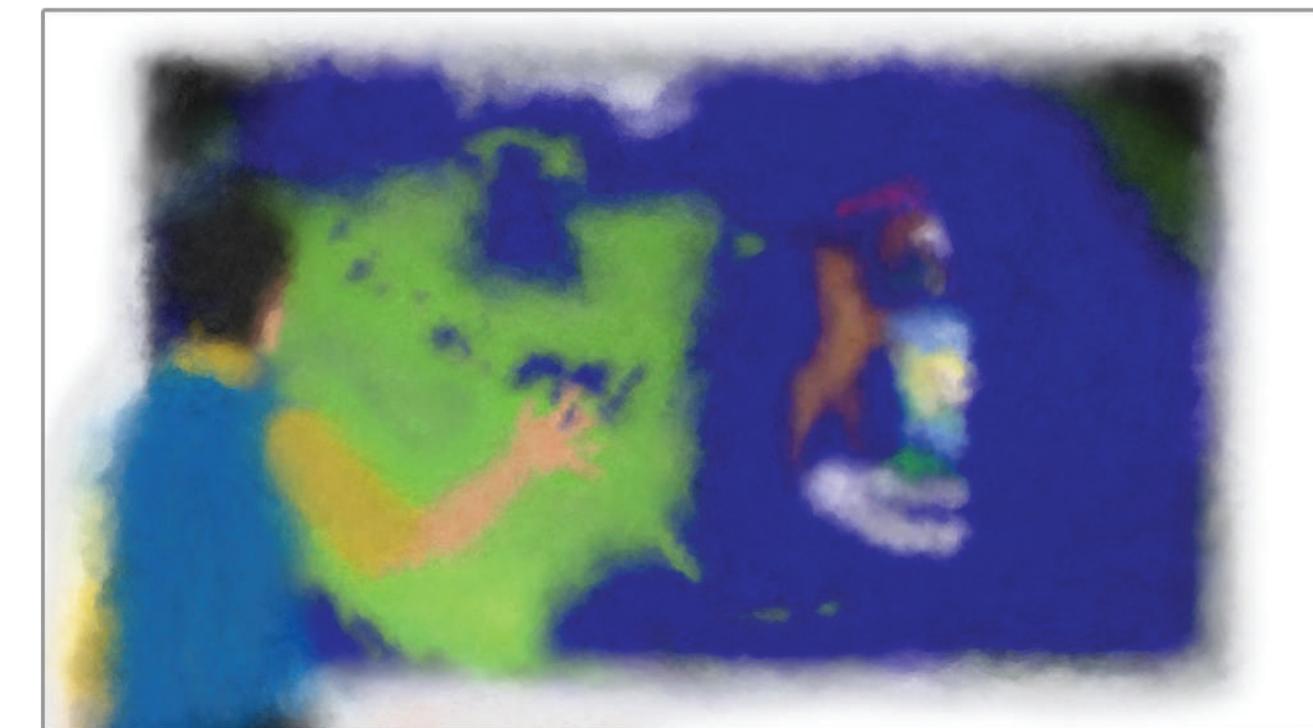

I know I just stated nothing else will be installed in this, but the GPS is for the sake of transitioning in this presentation. And we all have short attention spans anyways.

ixDavid reaches his right hand for Michigan.

Earth stops rotating.

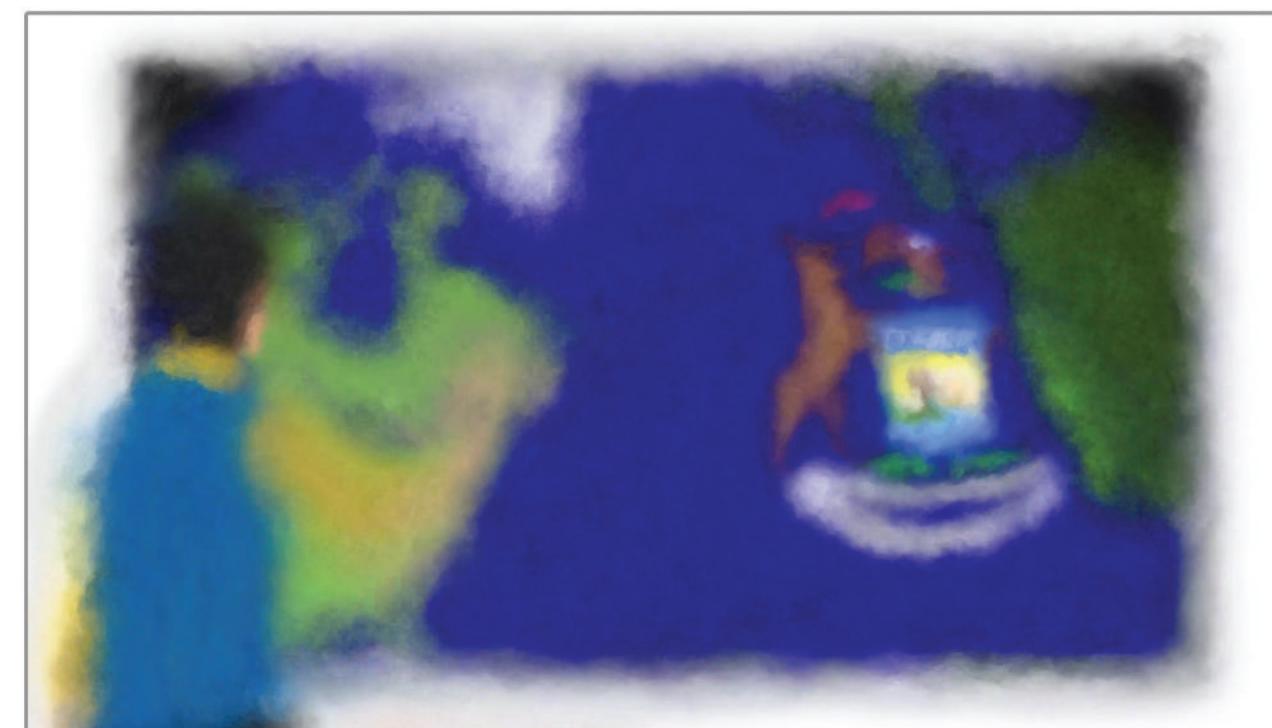

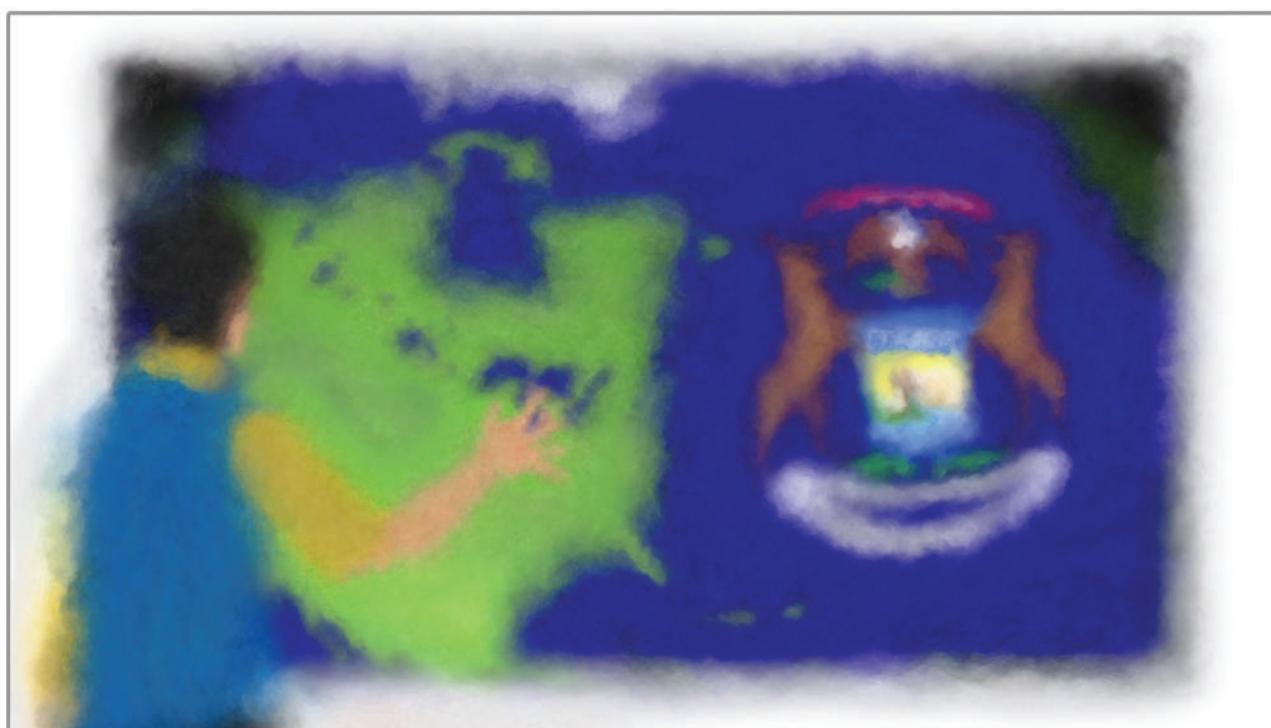

The state flag of Michigan reveals and expands in the Atlantic Ocean.

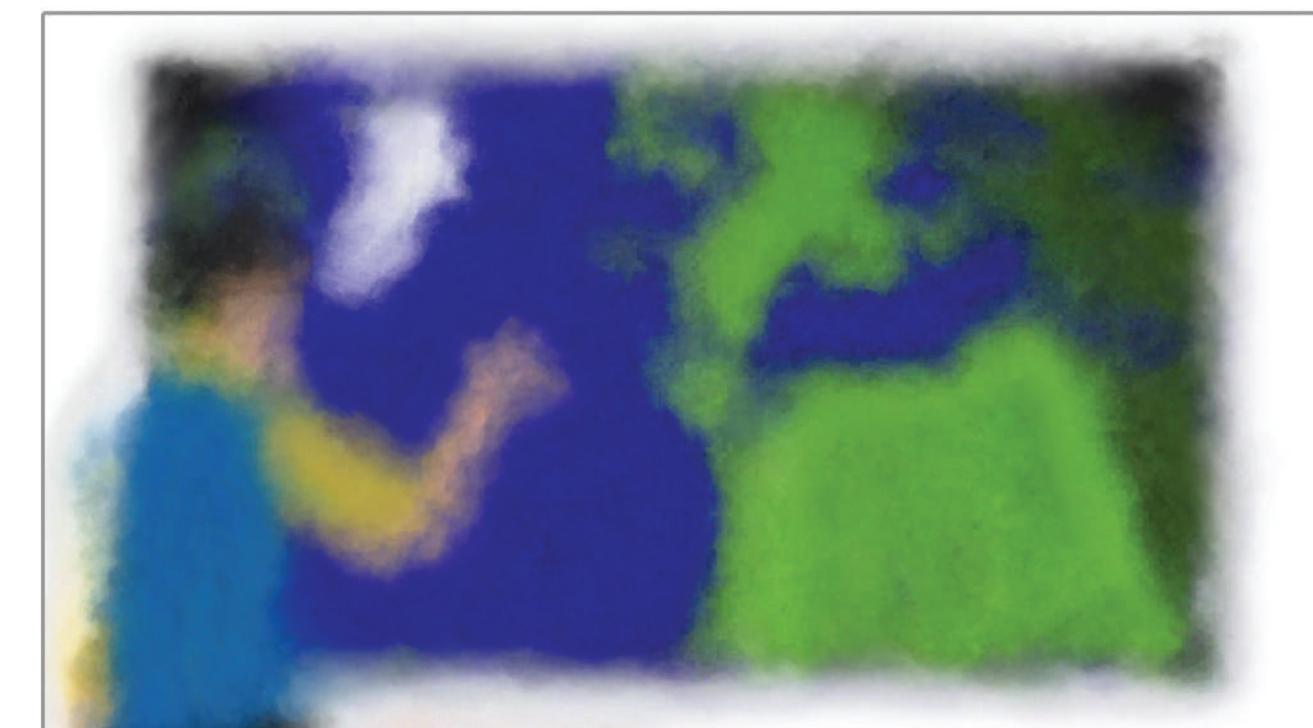

In Michigan...

...we are known for dynamic weather and the resulting traffic accidents.

Motor collision audio

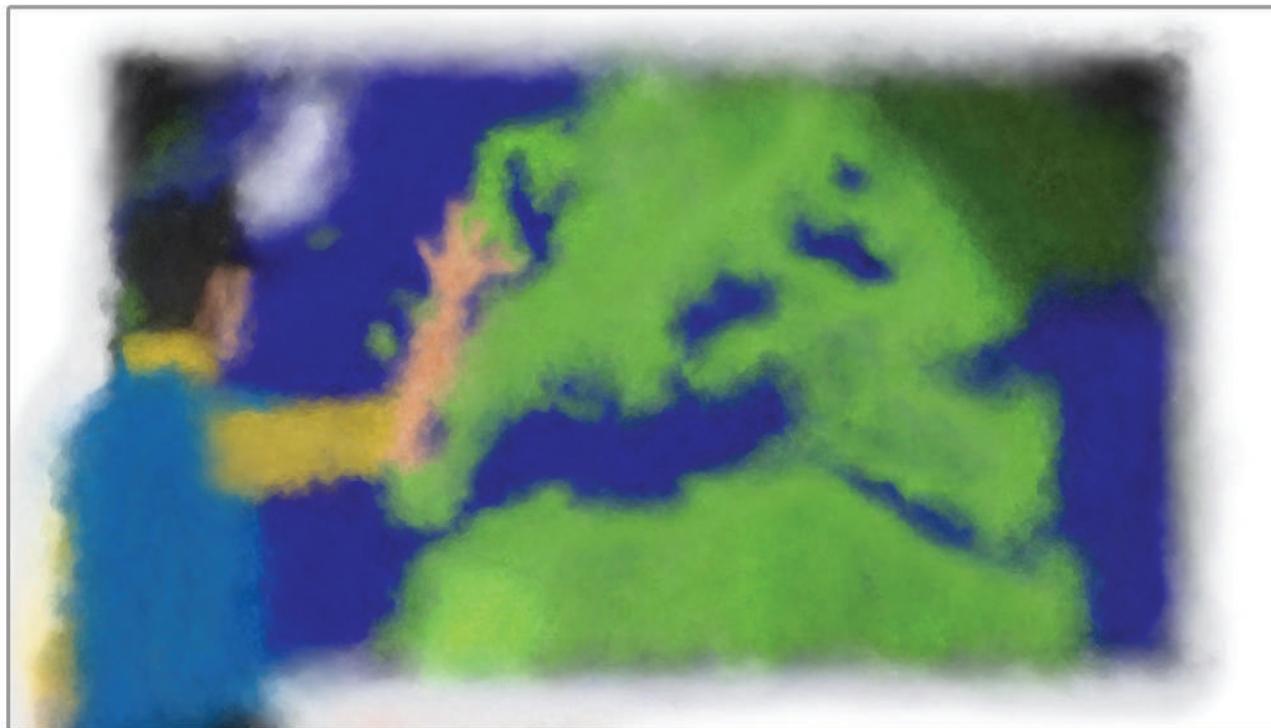

Earth oppositely rotates again. Africa and Europe engulf the state flag of Michigan.

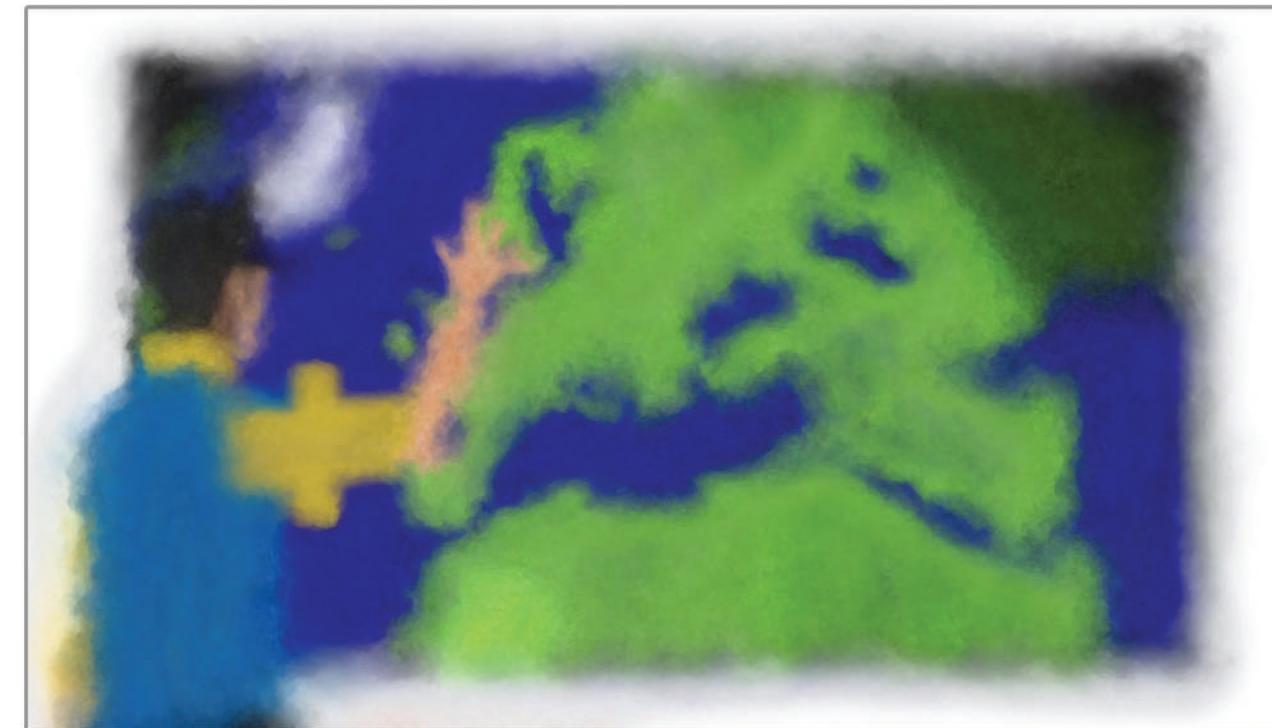

ixDavid extends his right hand and turns his body as Sweden is in view.

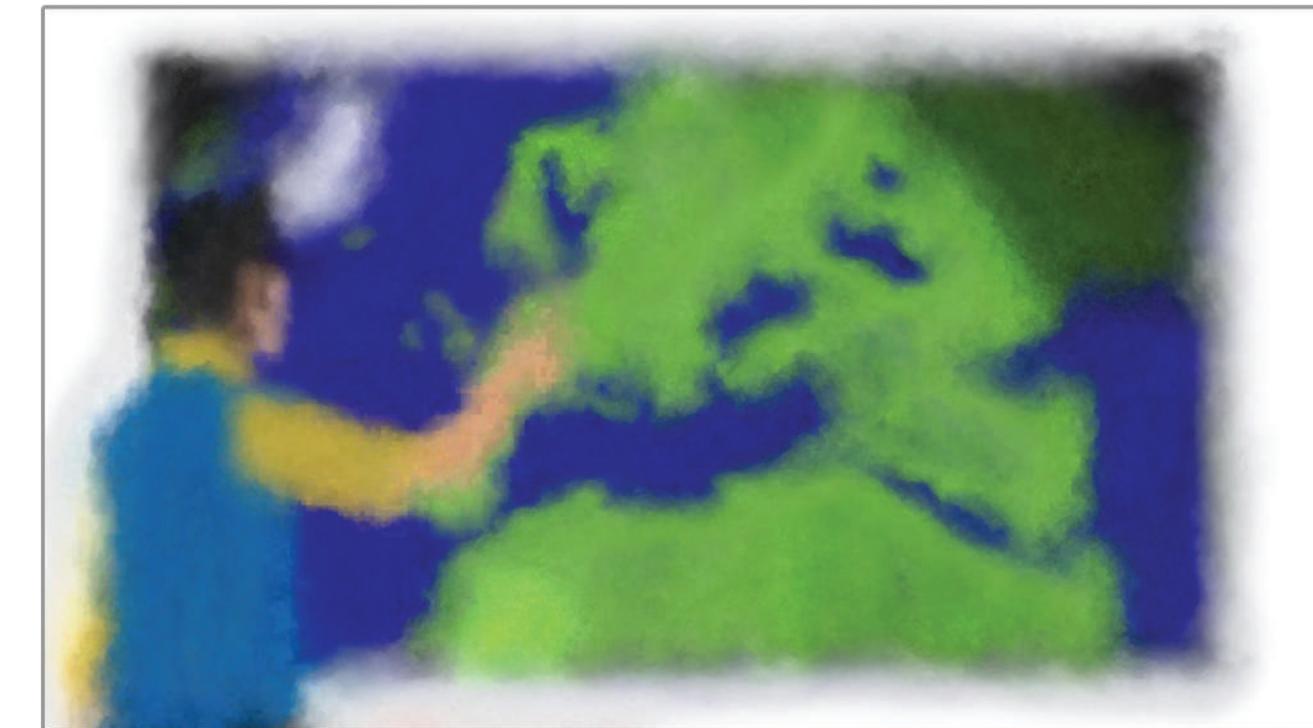

Sweden is about...

ixDavid's right hand meets Sweden. Earth stops rotating.

The national flag of Sweden extends under **ixDavid**'s right arm.

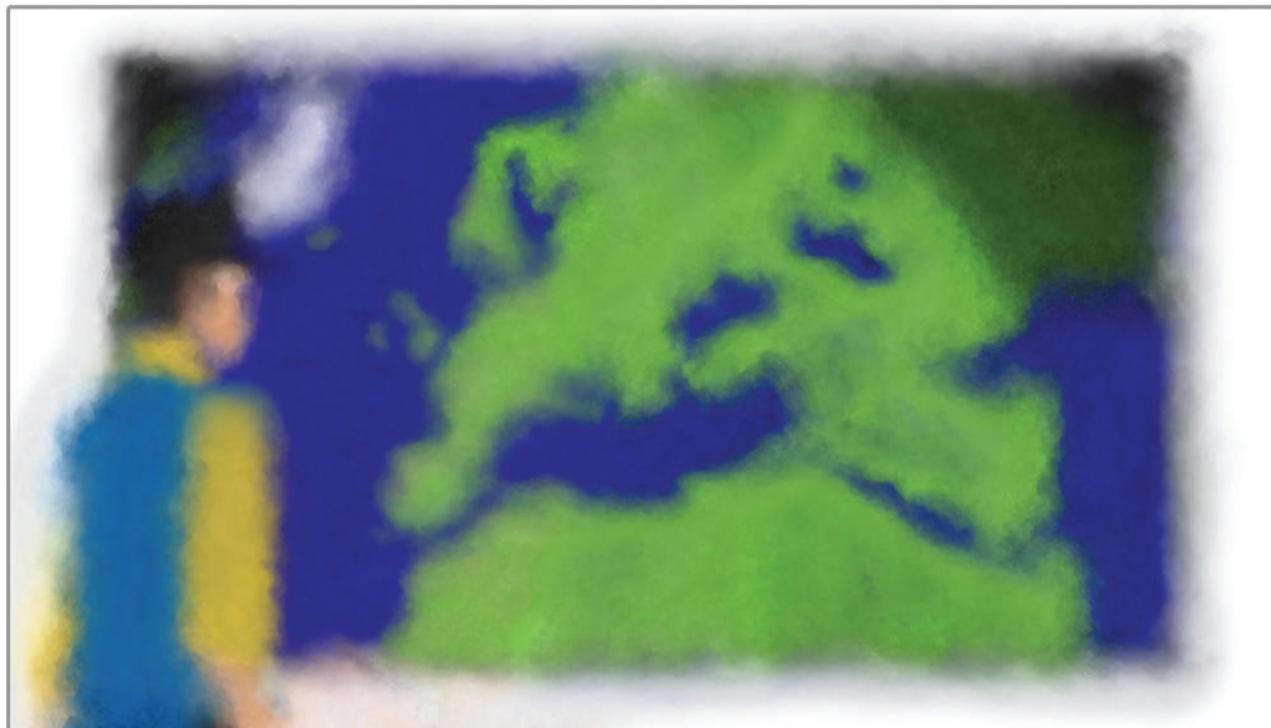

ixDavid retracts his right arm to his side. All of Earth's continents fades into white.

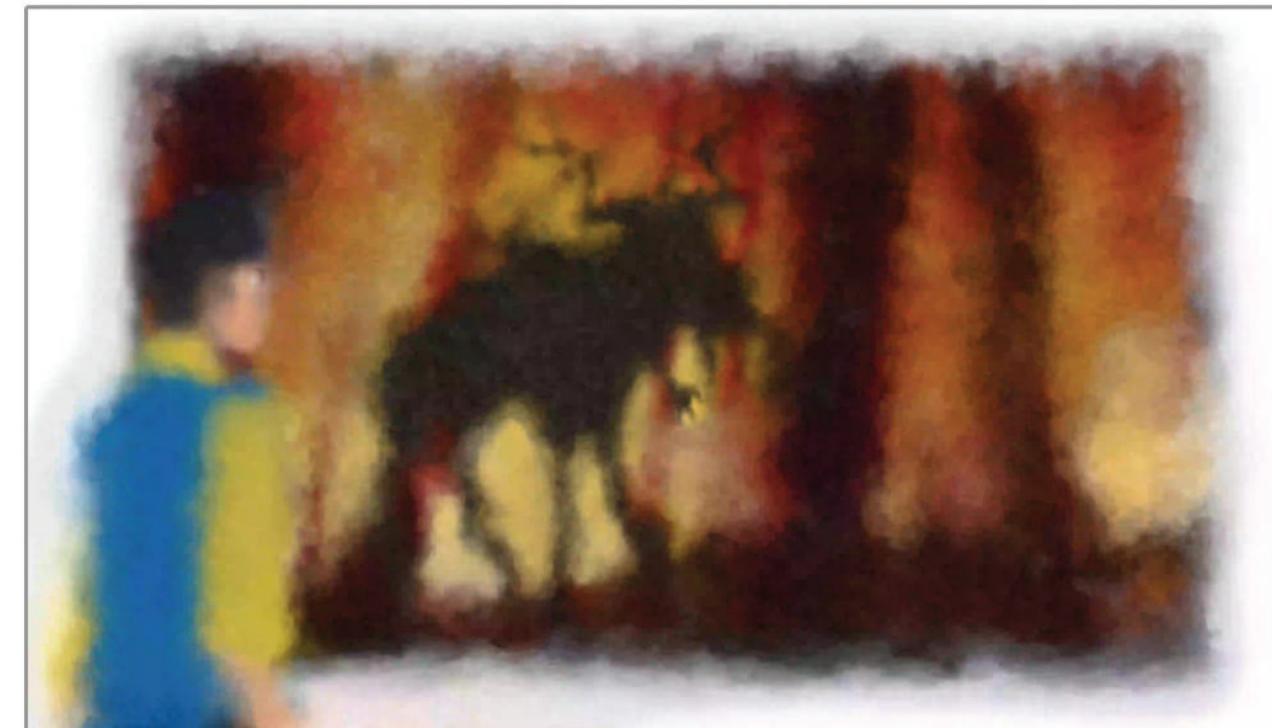

...fifteen degrees higher in latitude.

Not only do you have these accidents in...

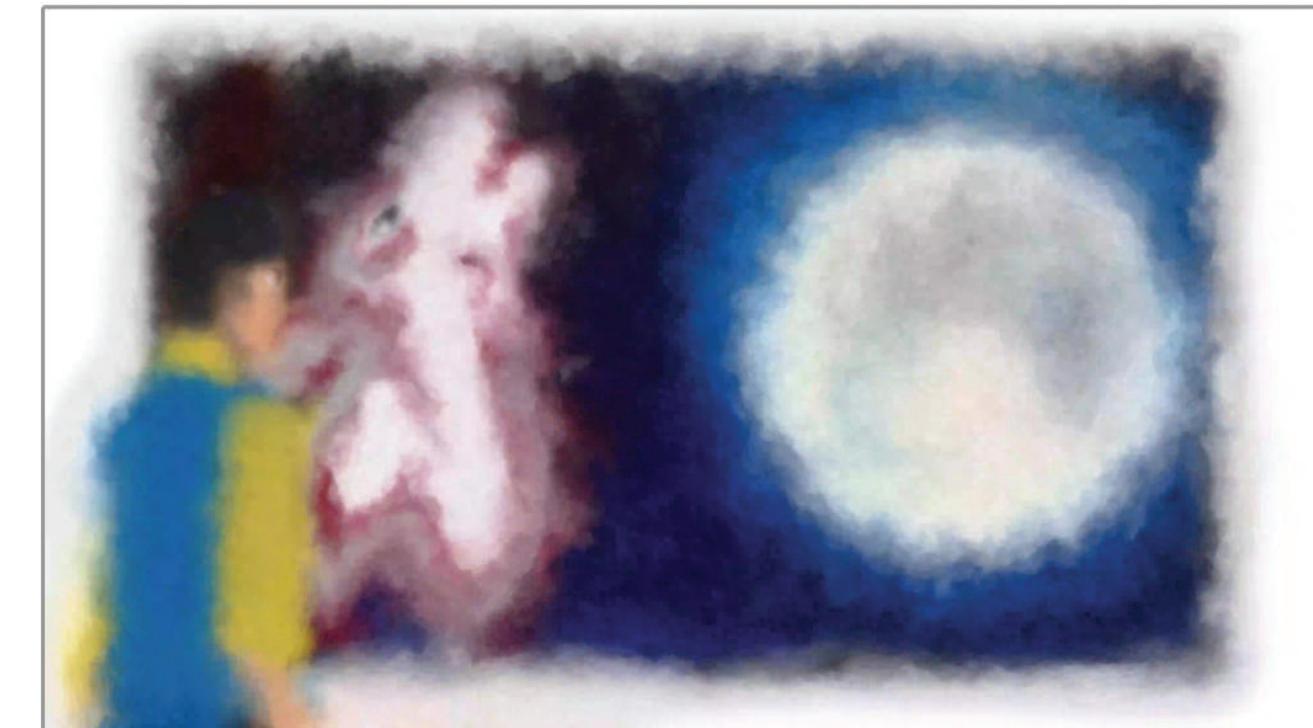

...colder weather.

The technoboard zooms into Scandinavia.

The technoboard immediately displays the Jötunn in a nightly forest fire.

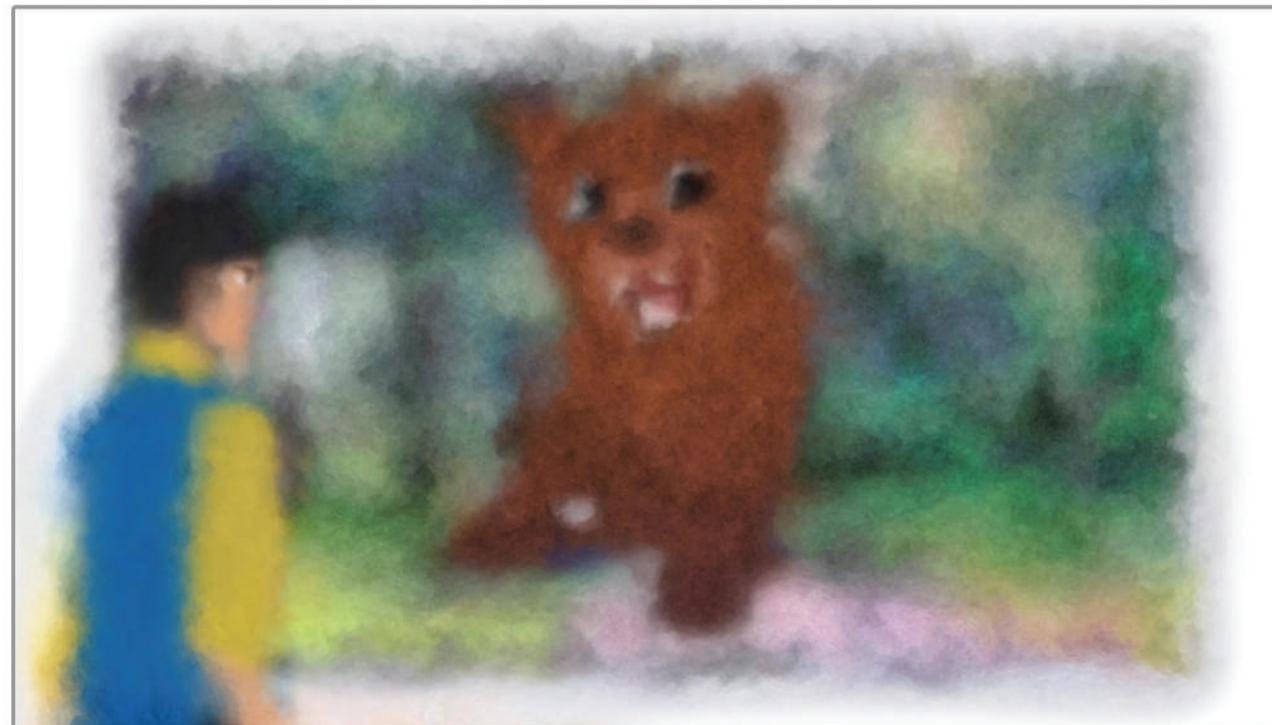

The technoboard immediately displays the logo of Wyoming High School next to a full Moon.

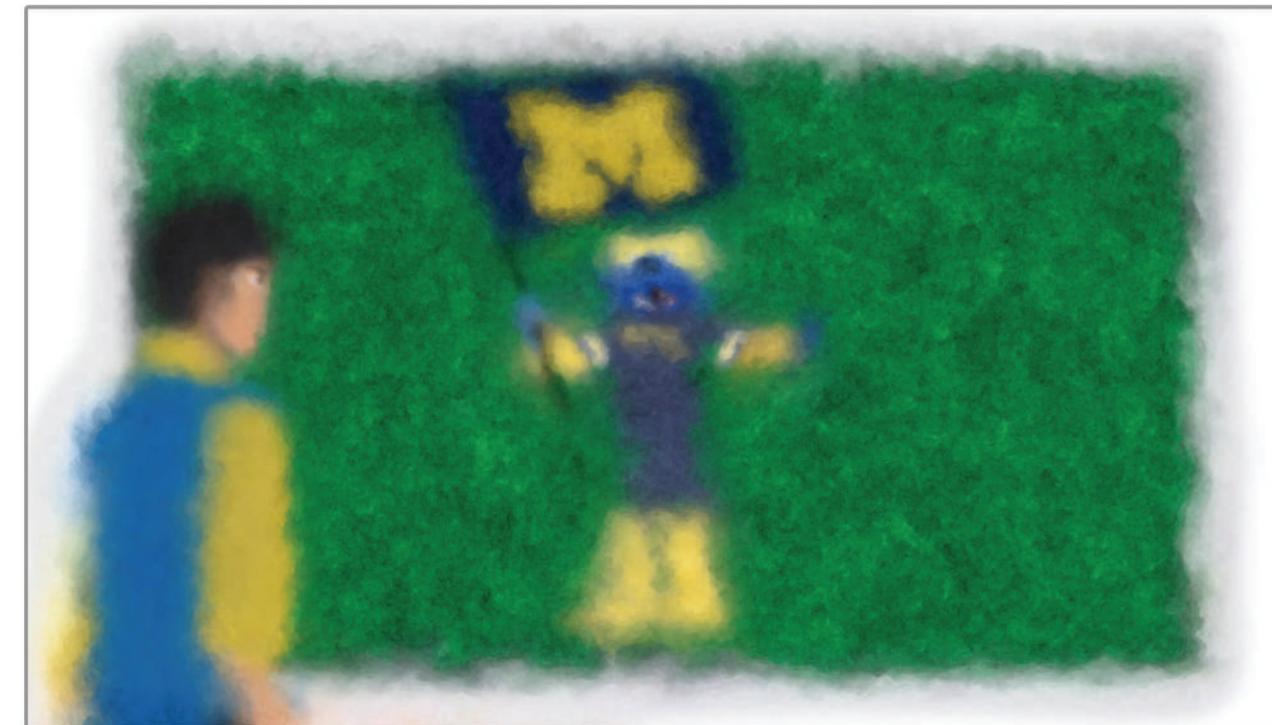

The Swedes trek to their offices...

...fighting moose,...

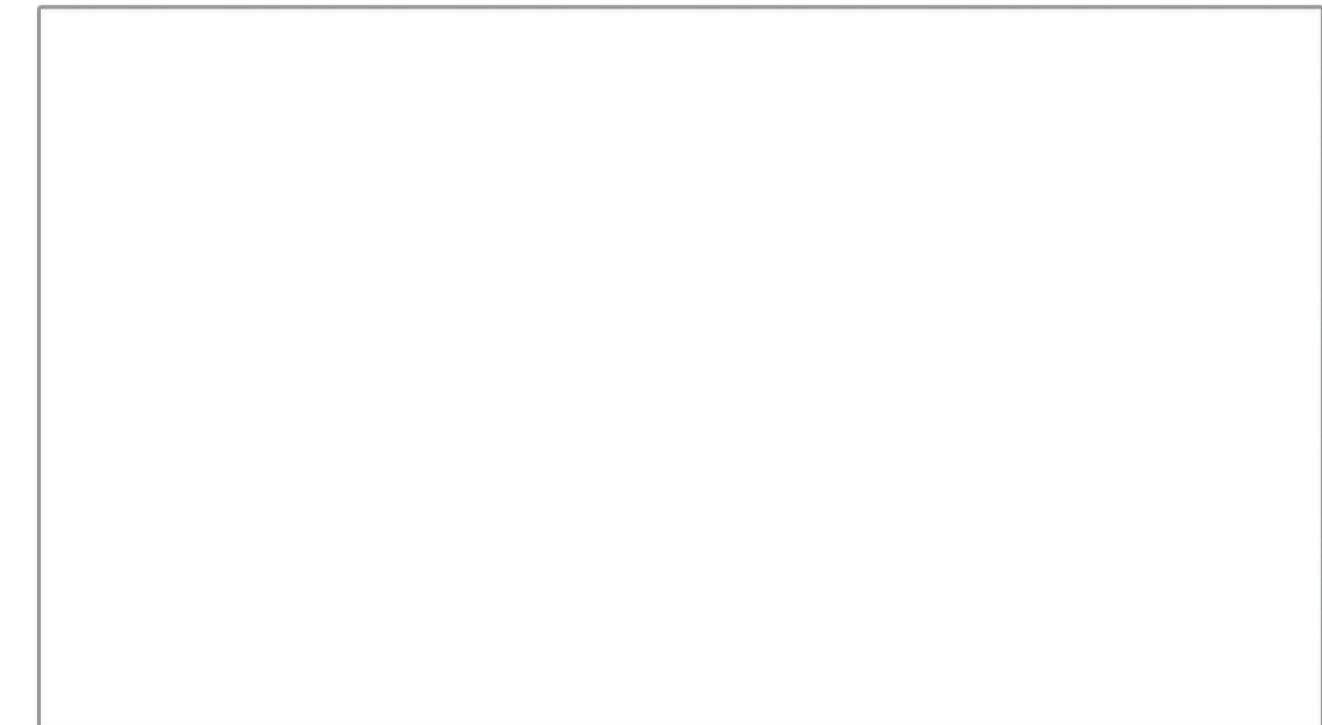

...wolves,...

The technoboard immediately displays Koda from *Brother Bear*. Koda is in an enchanted forest.

The technoboard immediately displays the mascot of the University of Michigan.

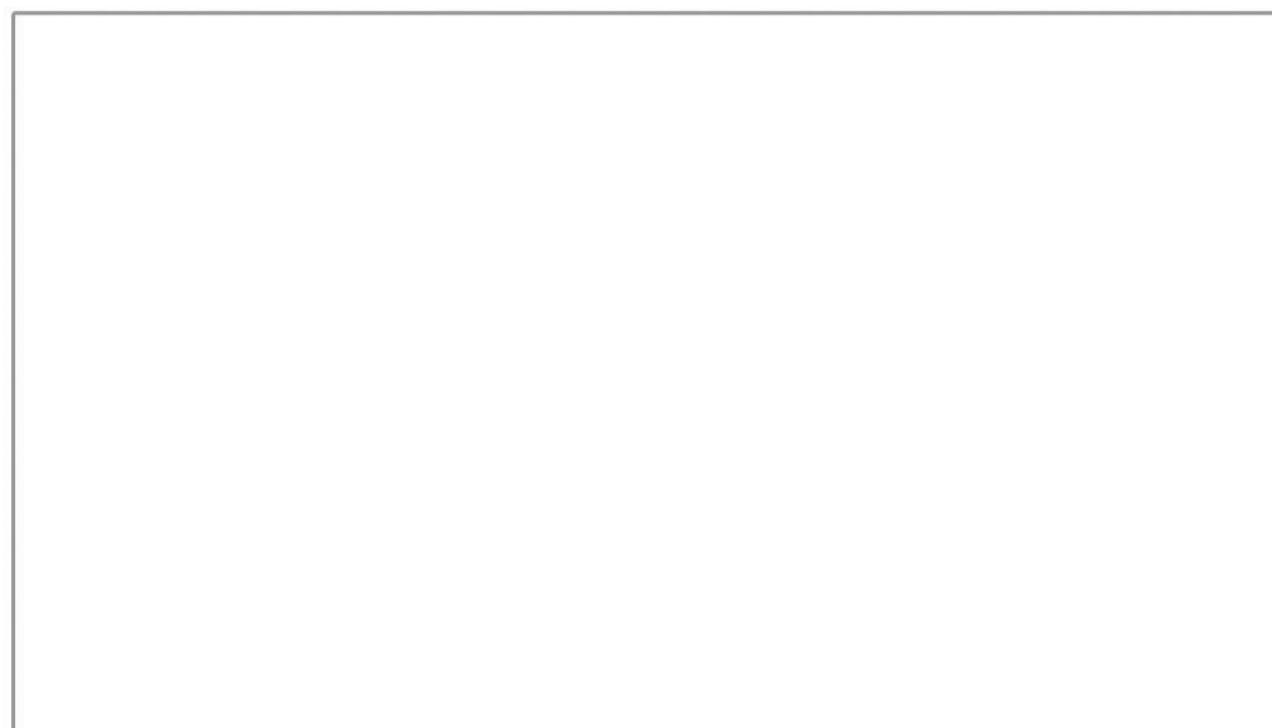

The wolverine clumps into an opened email icon.

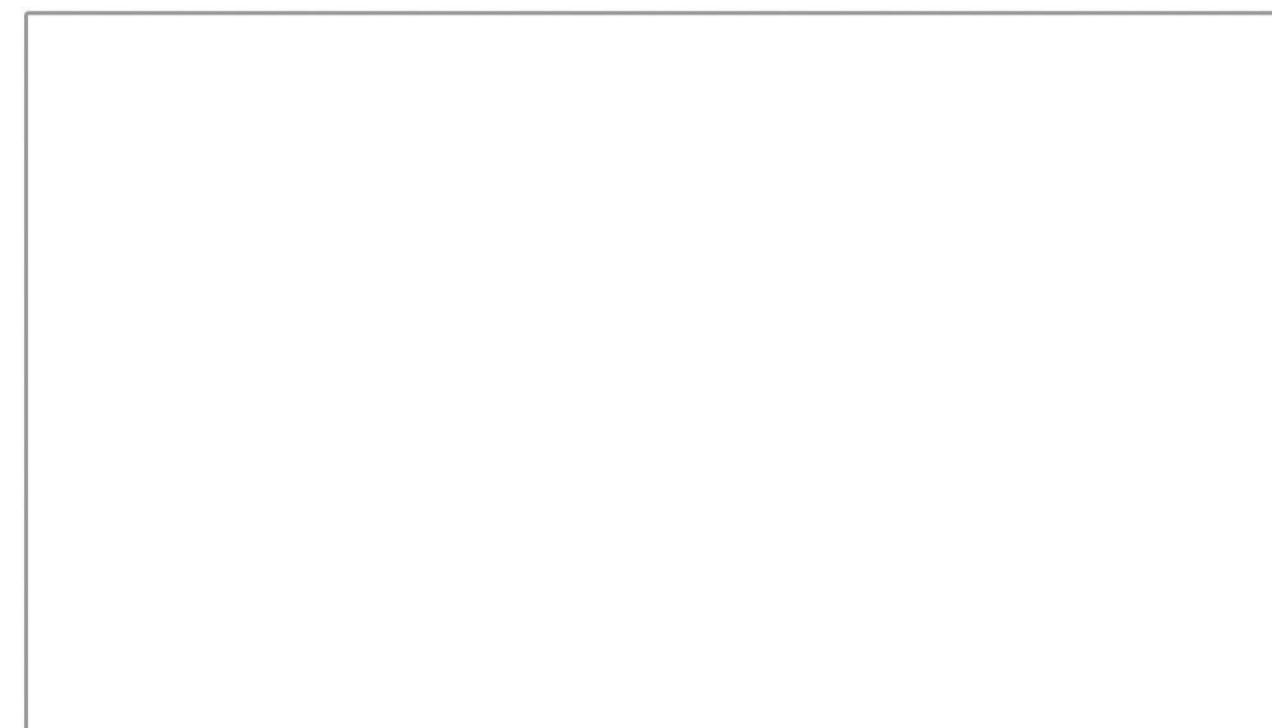

...bears, and worst of all...

...wolverines. The technoboard monitors and values human safety. Most of the time, a meeting in the office can be...

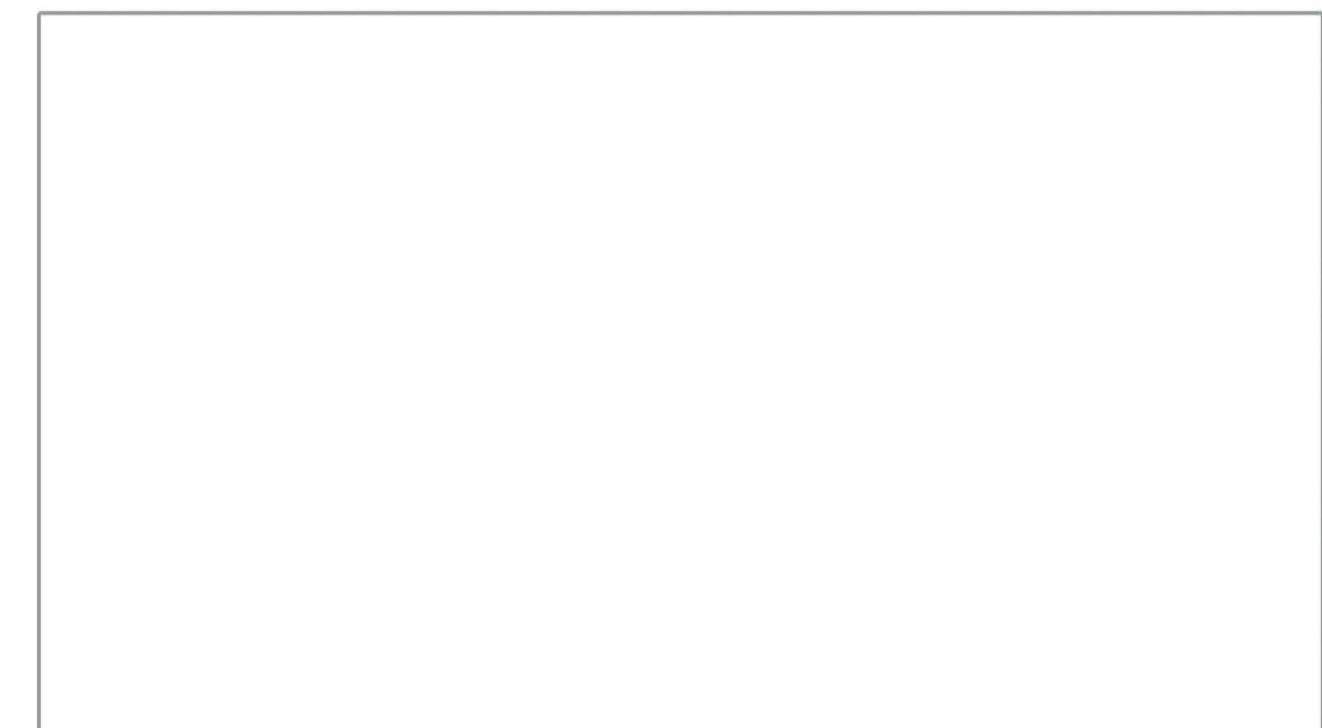

...summed up in an email.

The email icon closes its envelope.

The email icon opens up its envelope.

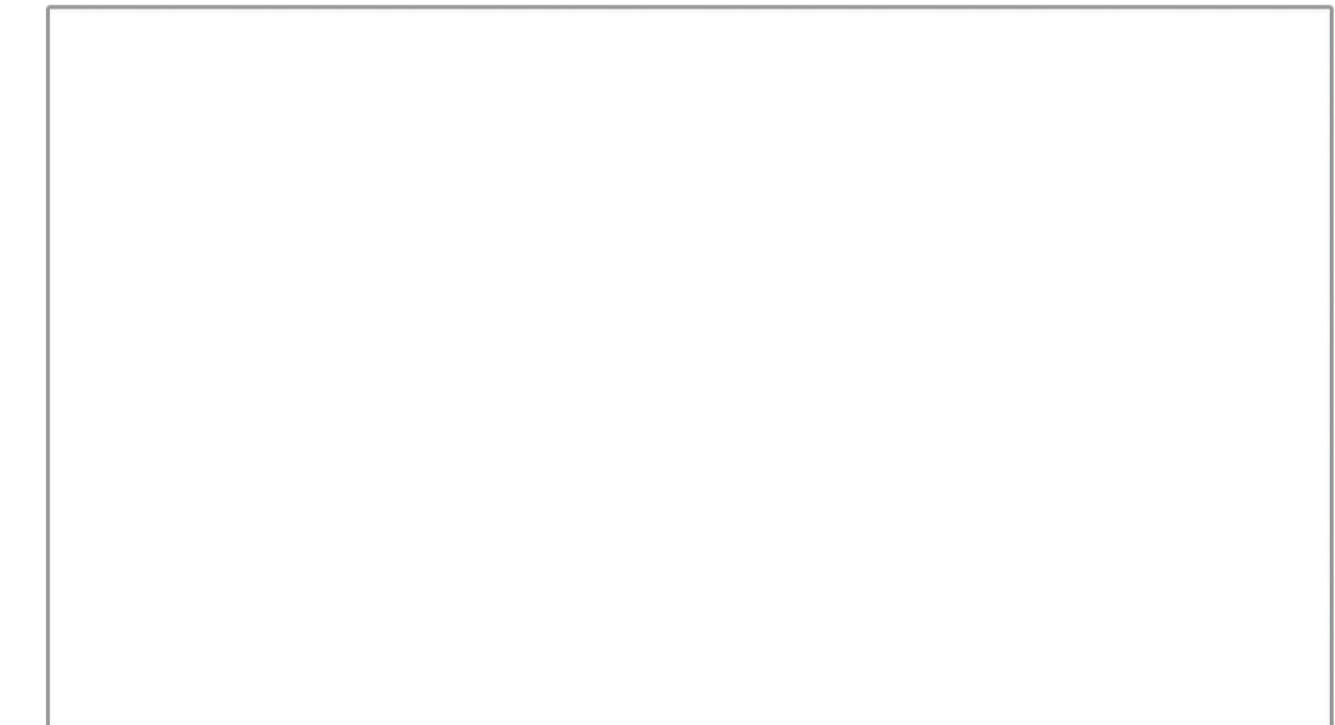

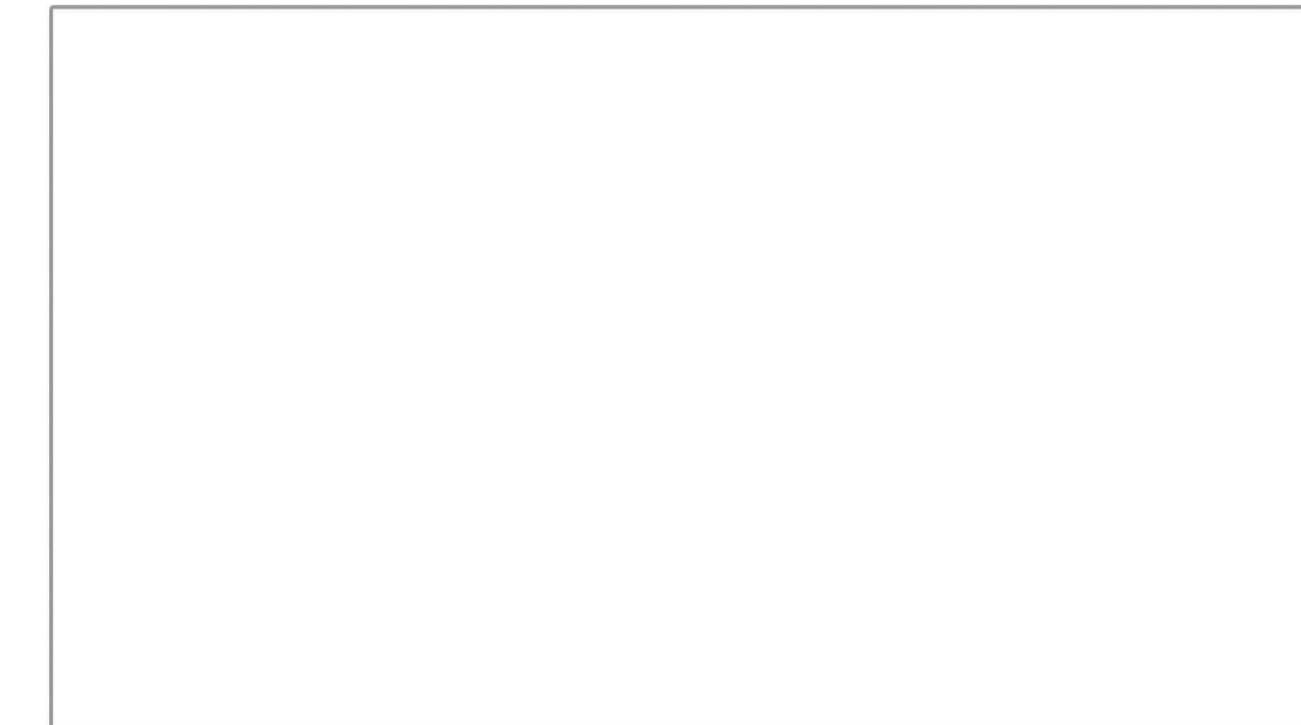

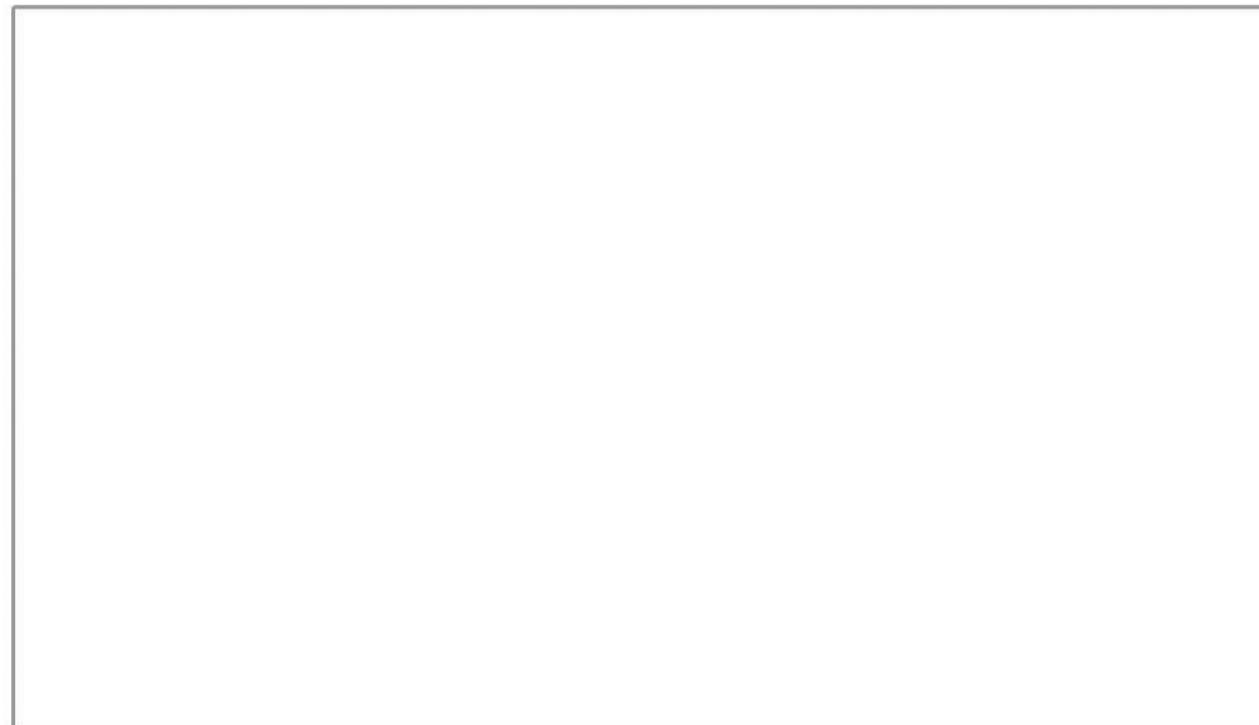

A postcard expands from the opening of the email icon.

Let it be so. If you're here anyways,...

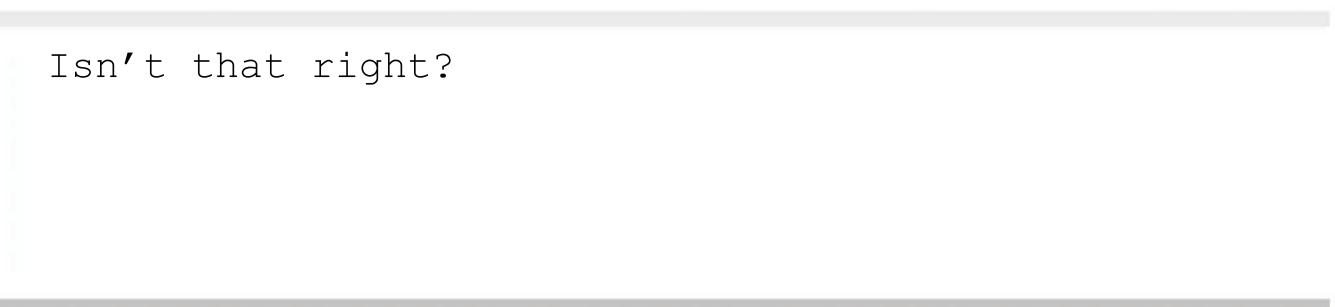

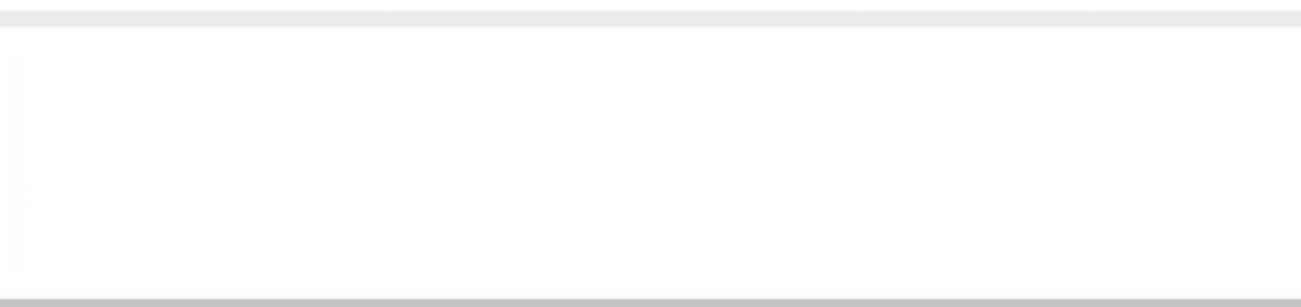

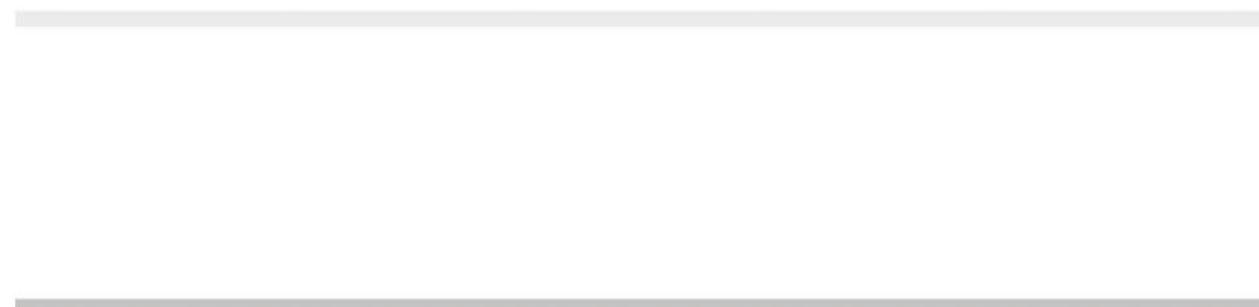

...you and others can connect to...

...a study room's technoboard by inputting an automated code through the technoboard's website.

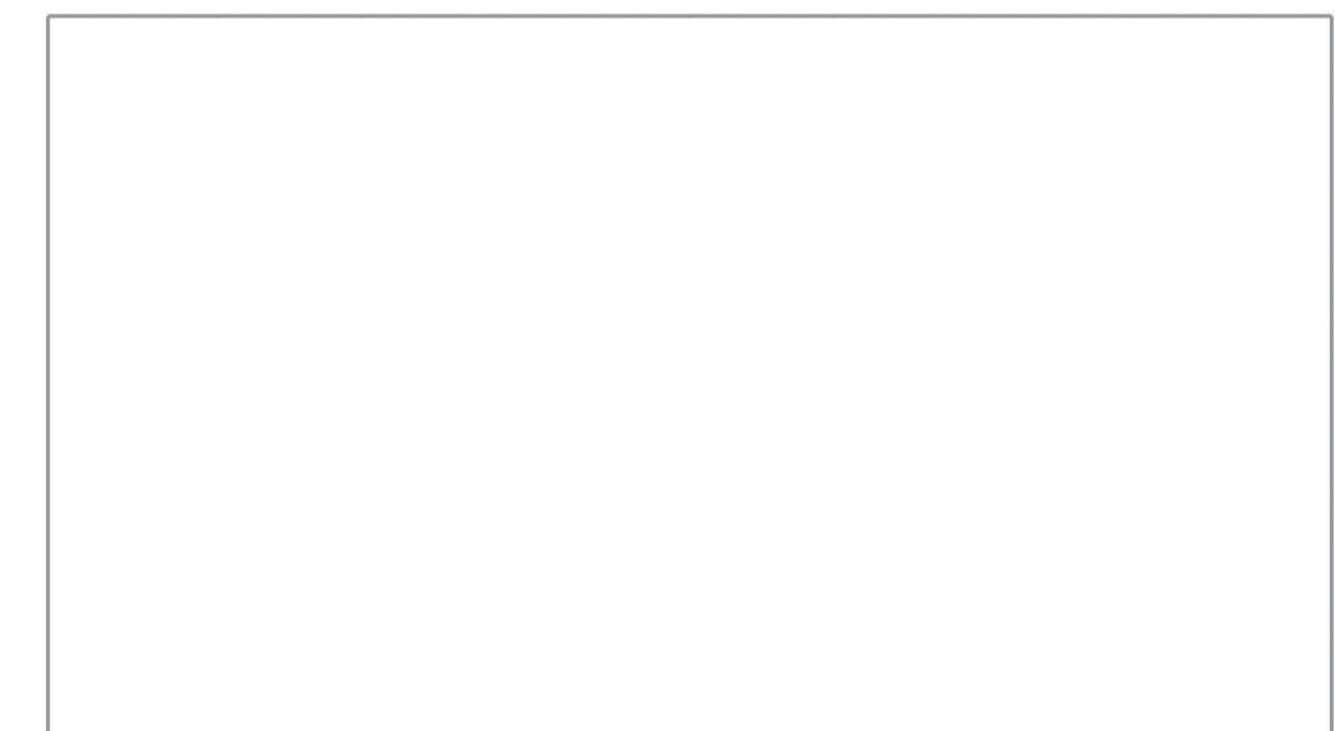

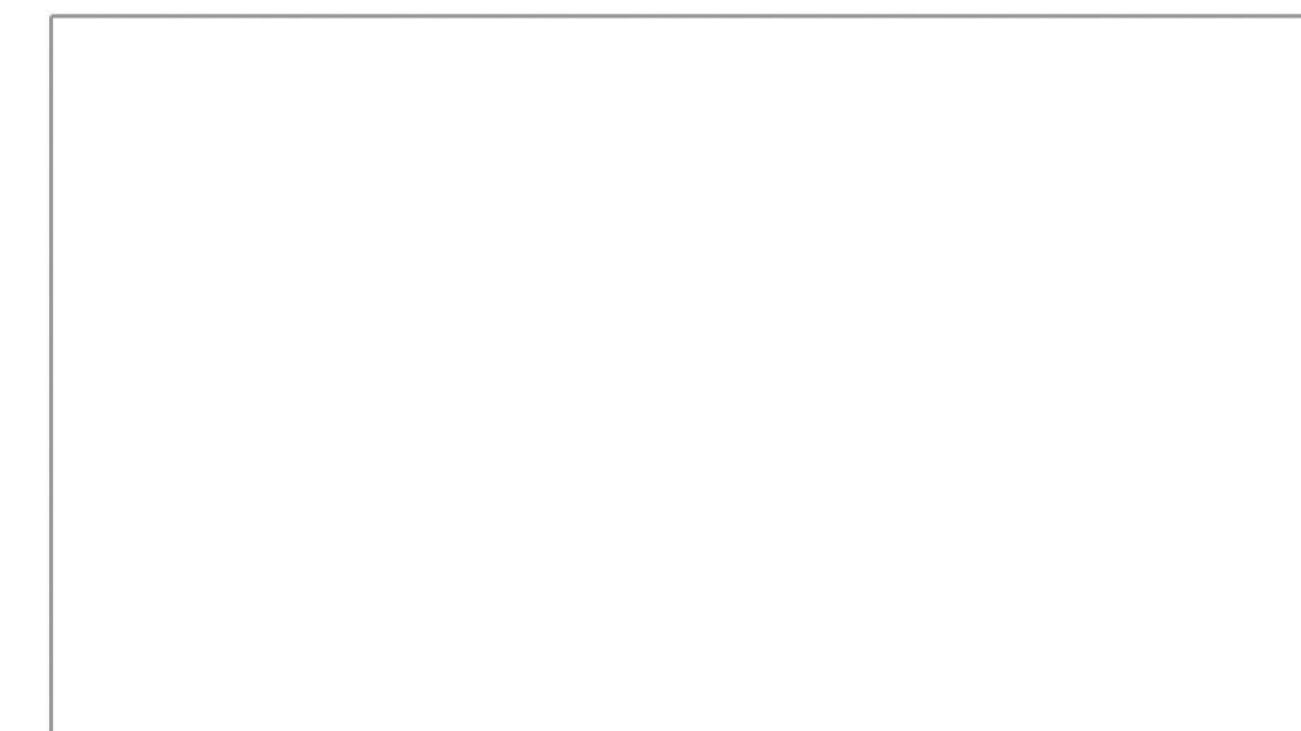

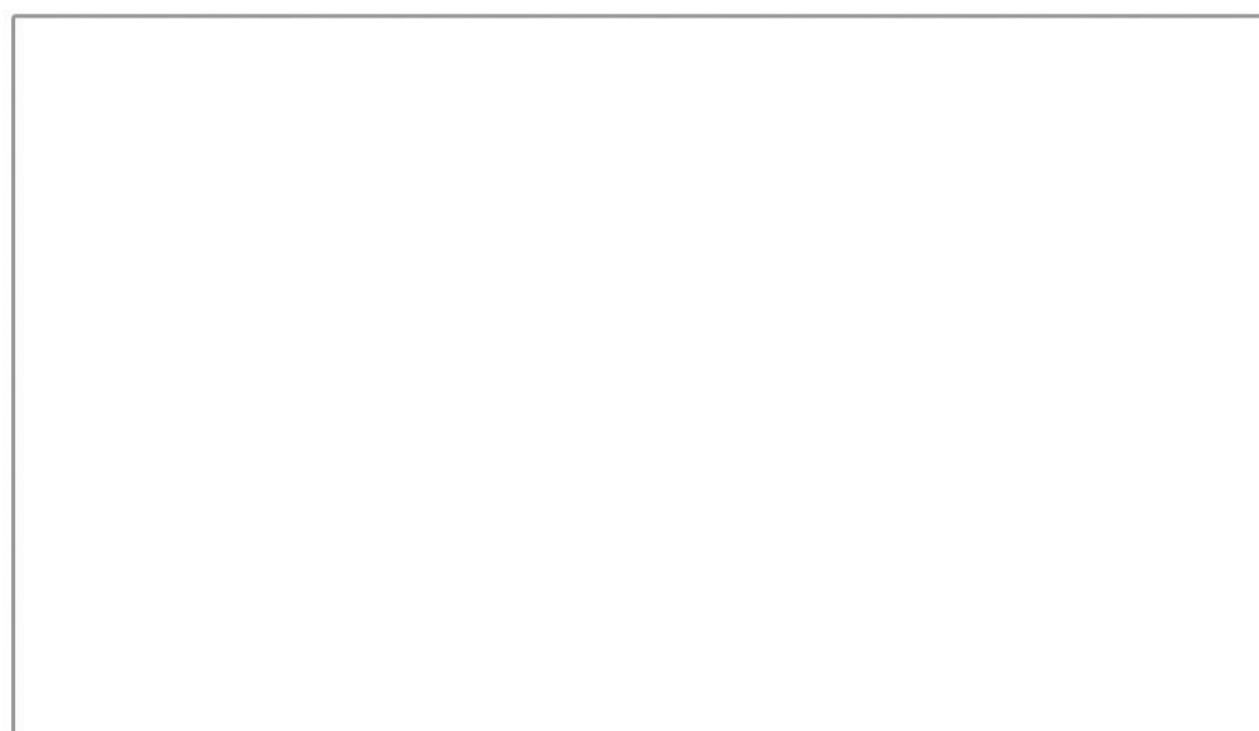

The postcard takes up the technoboard.

ixDavid turns to face the camera.

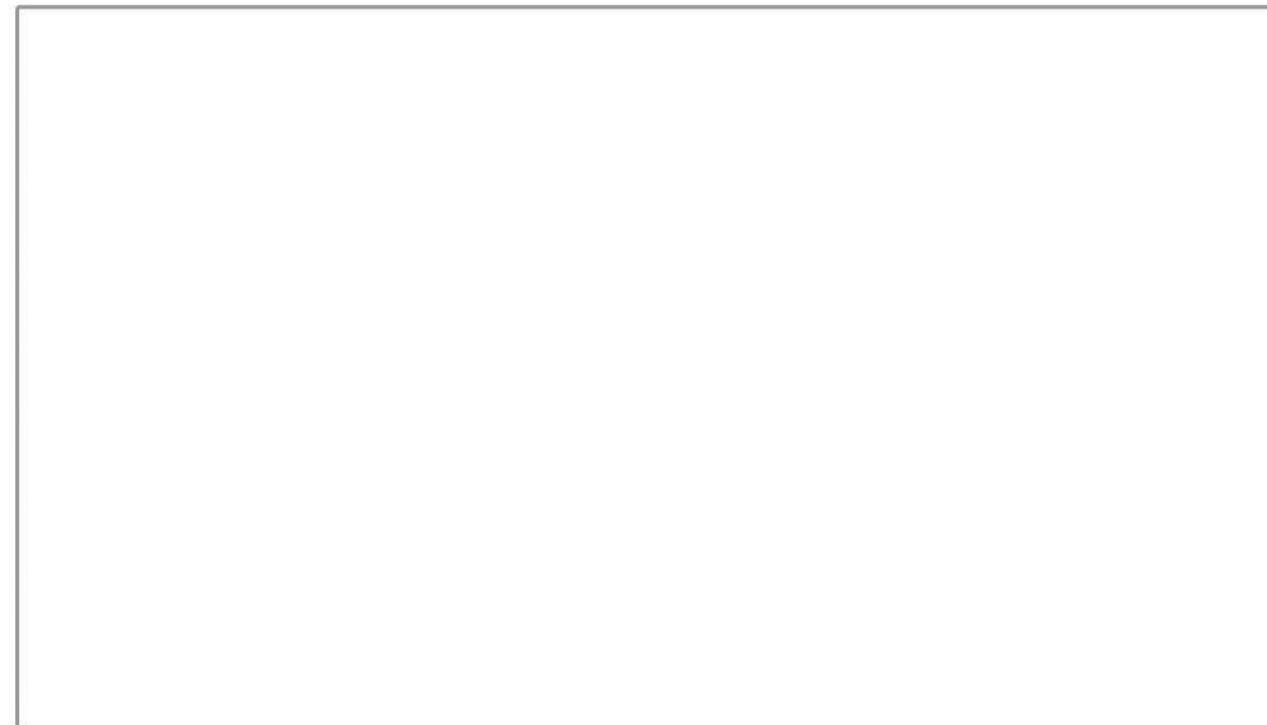

Isn't that right?

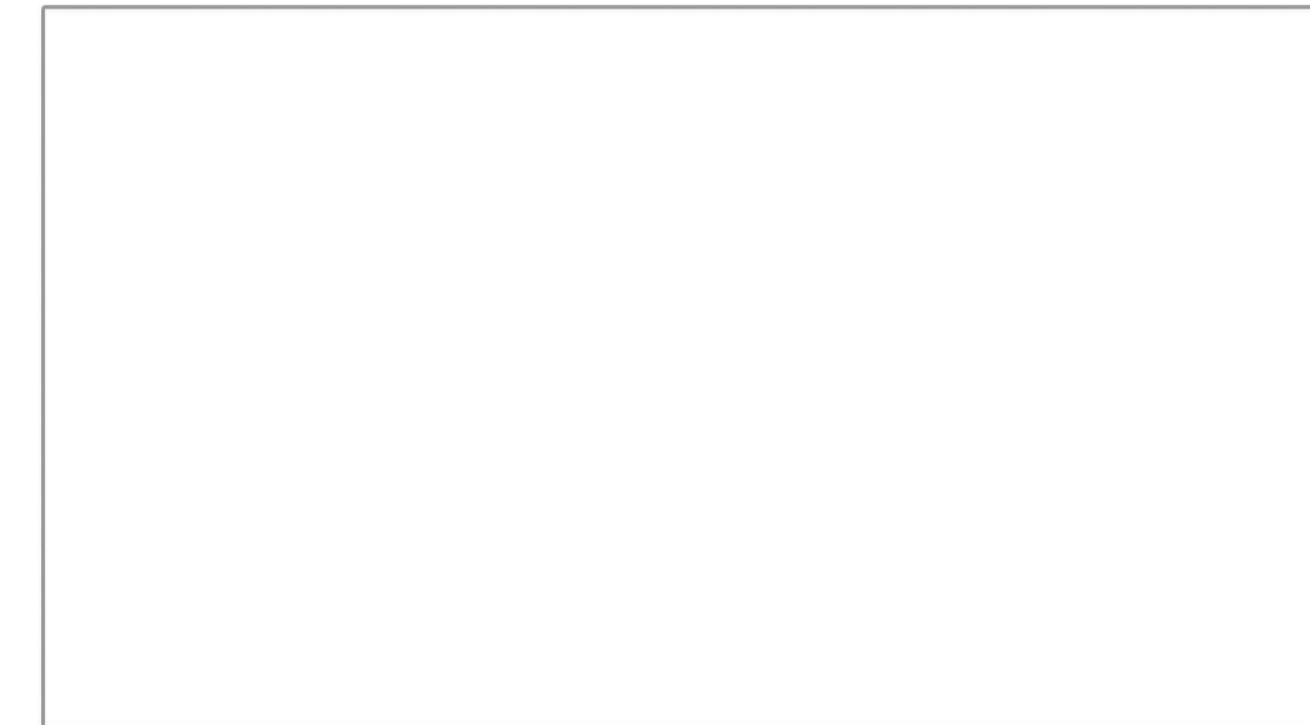

ixDavid blinks twice.

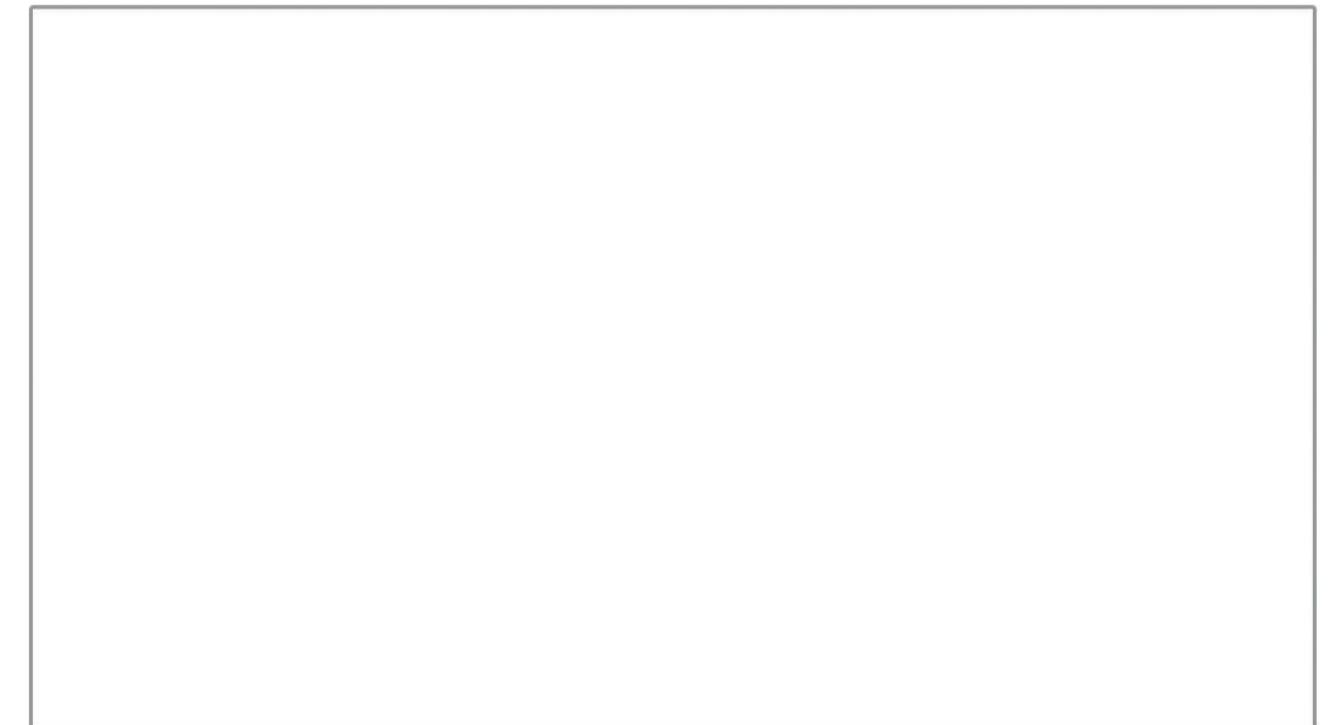

Fellow designers?!

ixDavid raises his right arm to the camera.

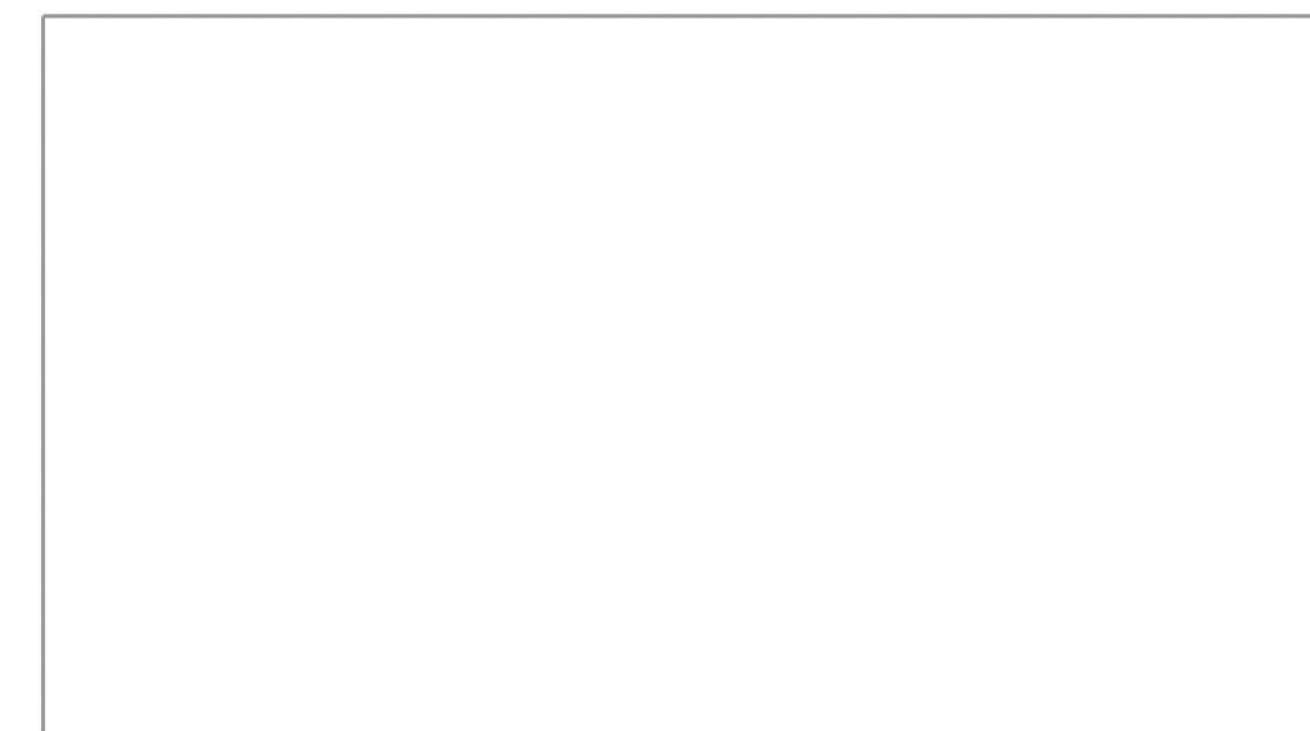

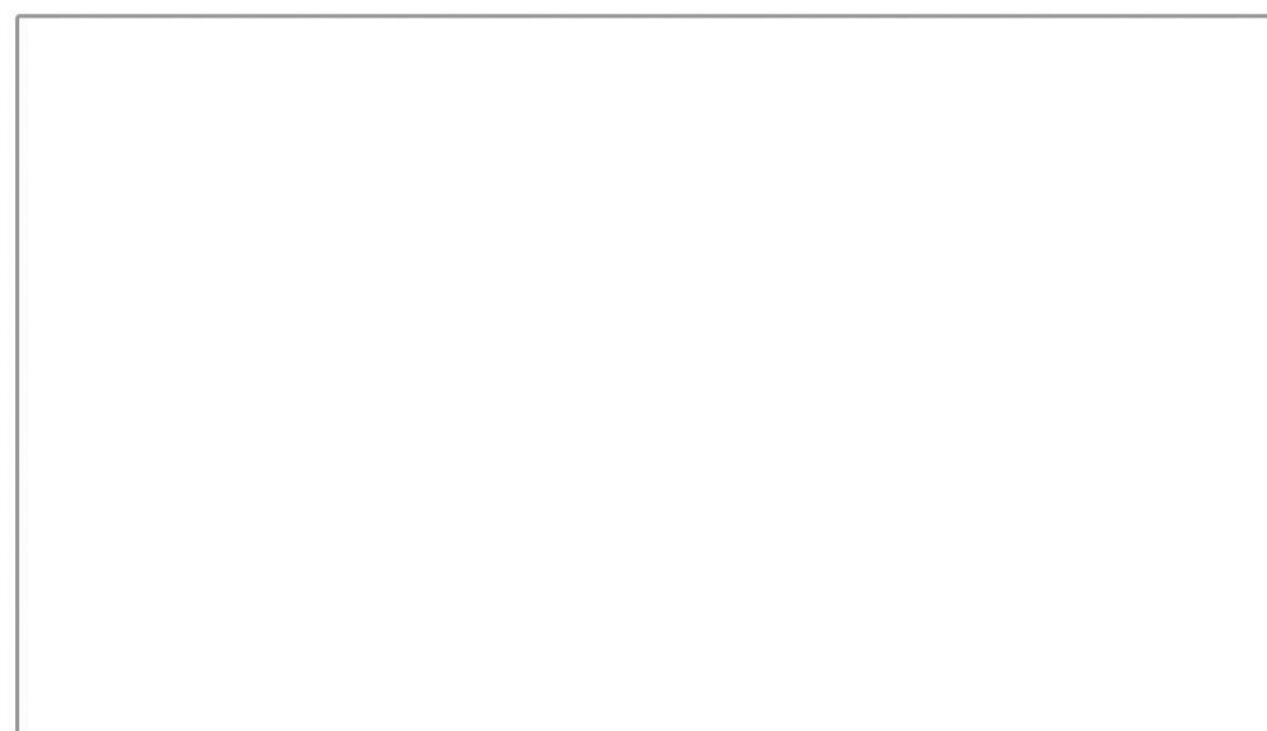

ixDavid points to the camera.

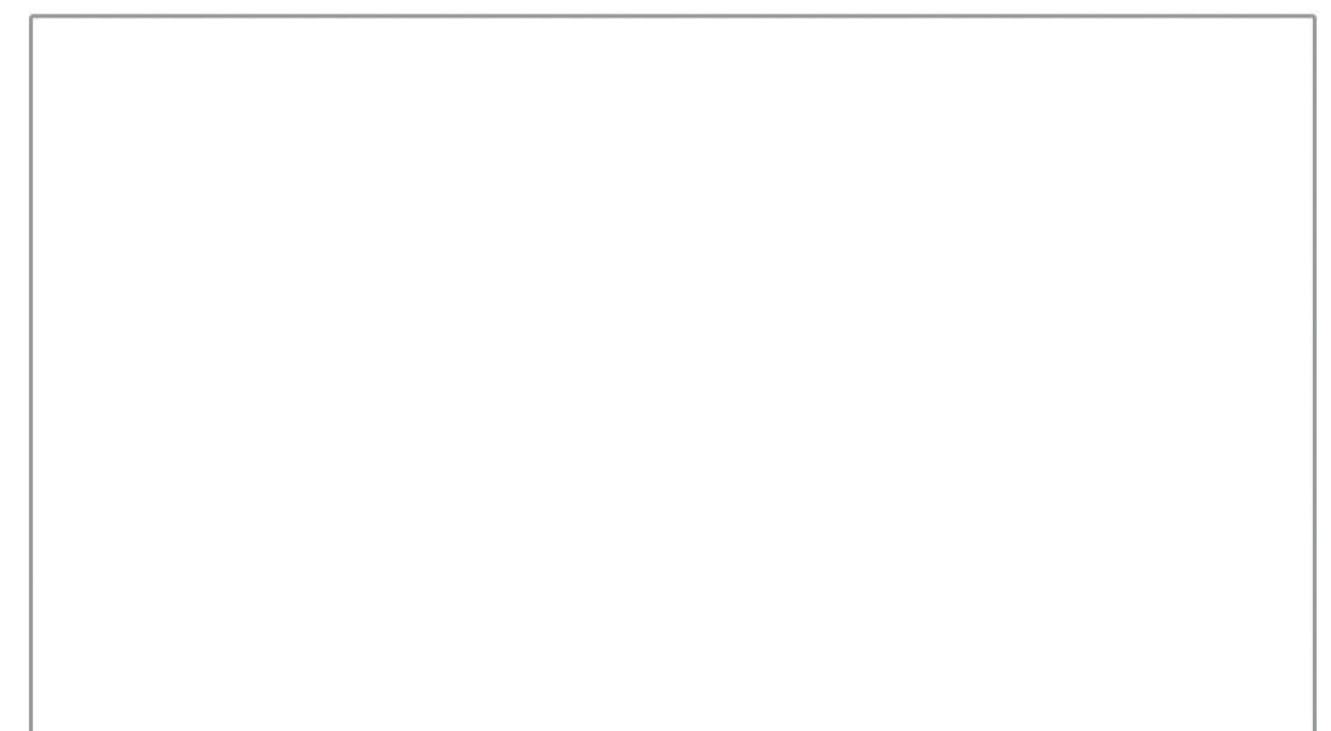

The canvas pans right to reveal three designers at two tables. The left has a laptop, the middle is on their phone, and the right has a tablet.

Turn the camera around.

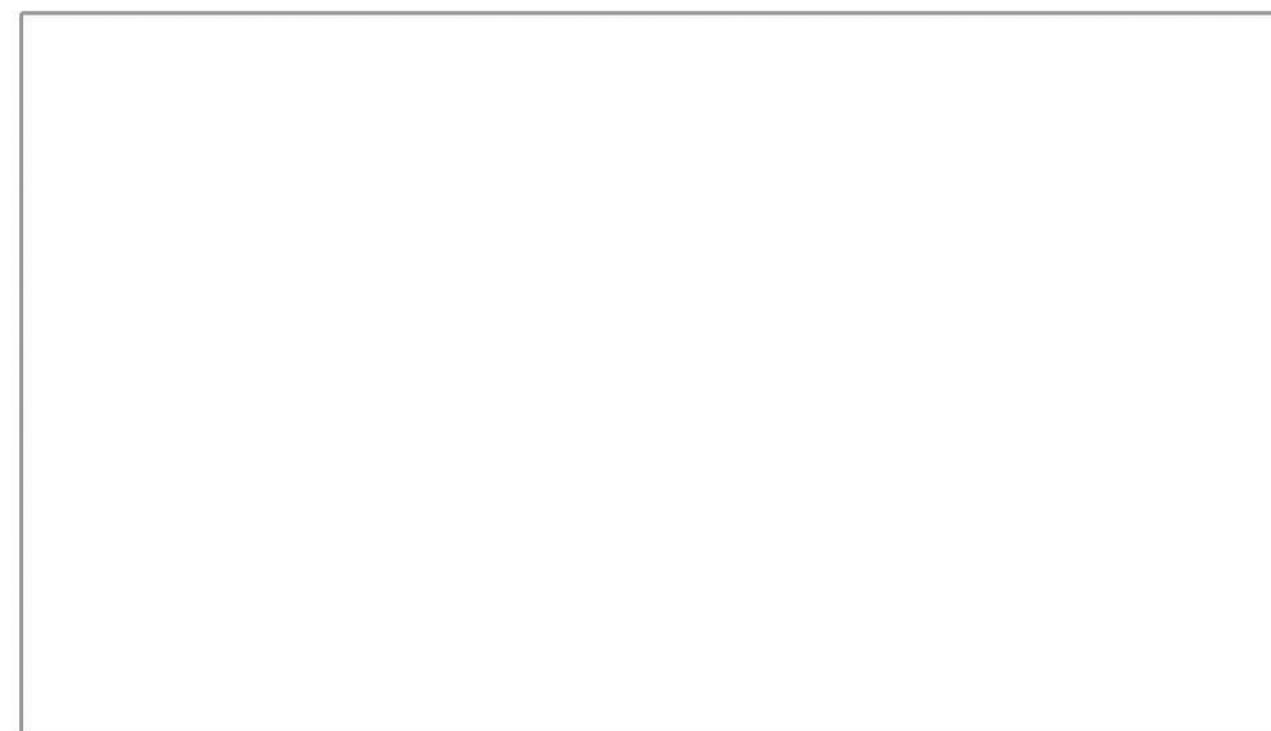

The phone flashes.

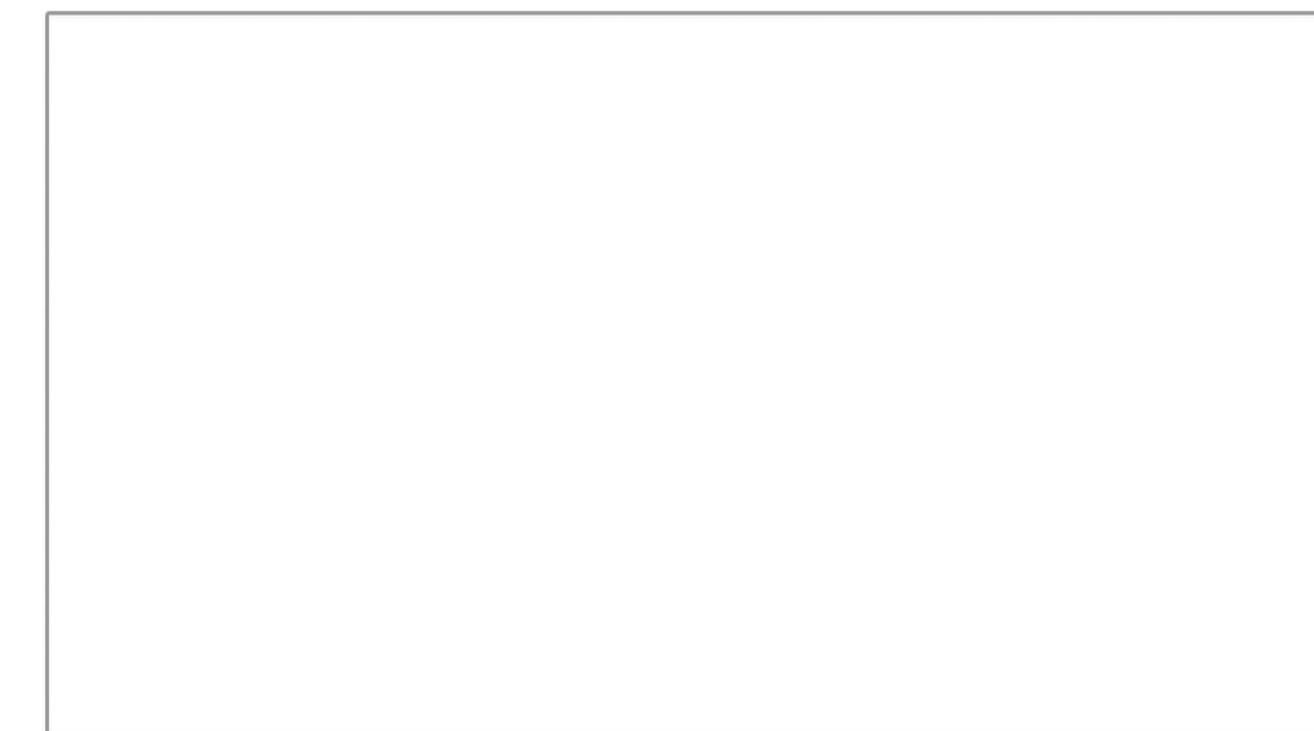

They are unresponsive as paintings.

No more blurry photos before your fellow designer erases what is on the board...

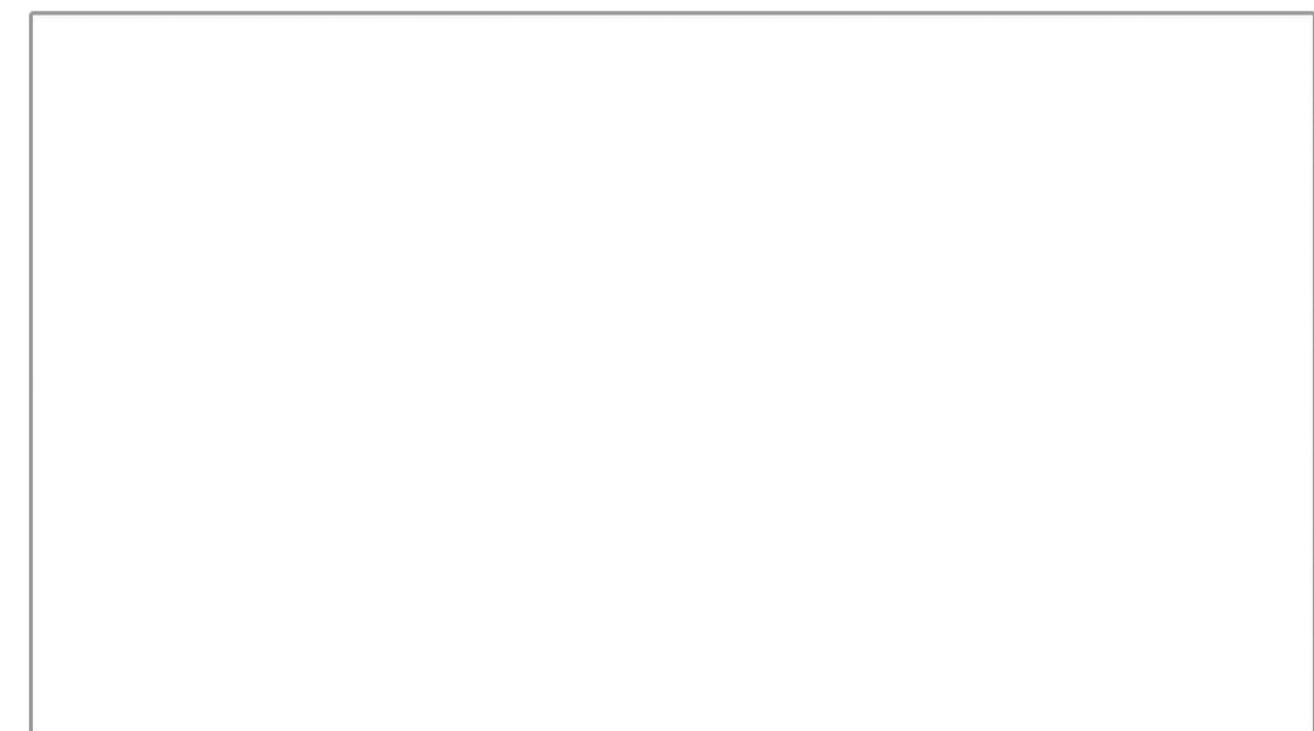

Flash audio

The screens of the laptop, phone, and tablet flashes.

All designers immediately smile.

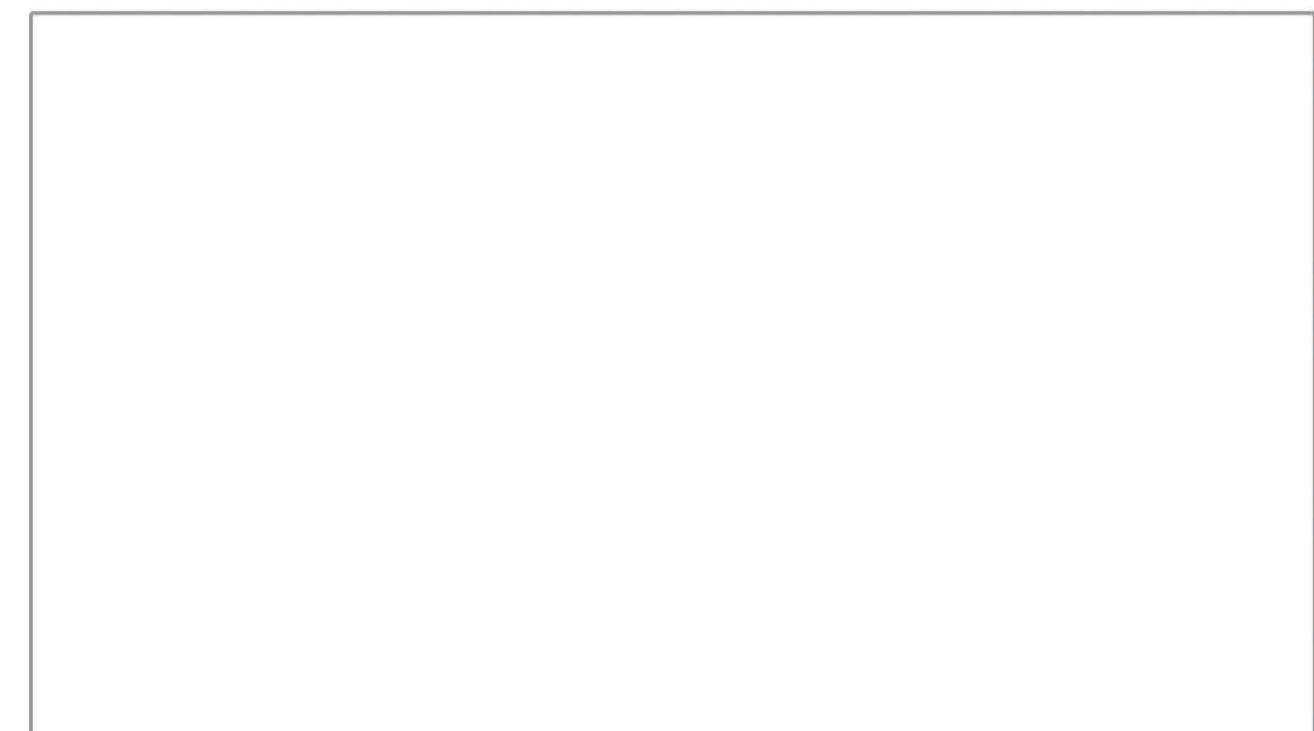

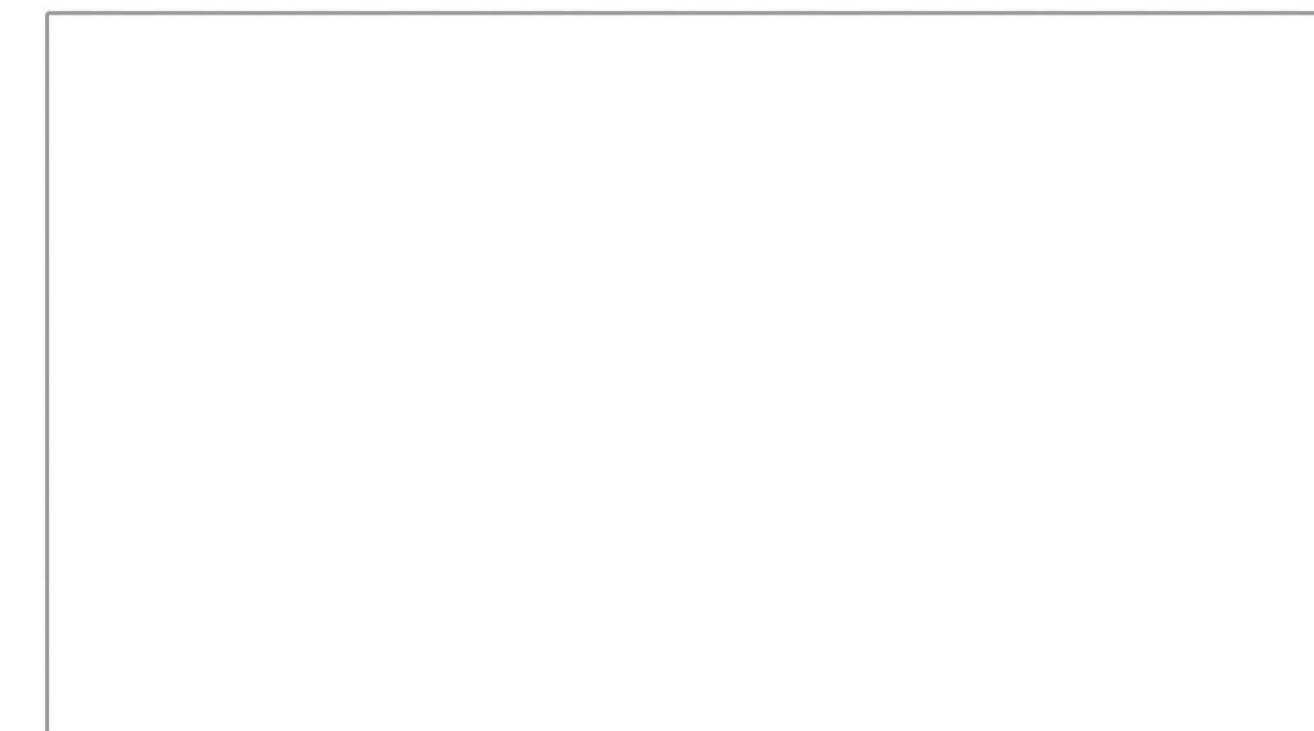

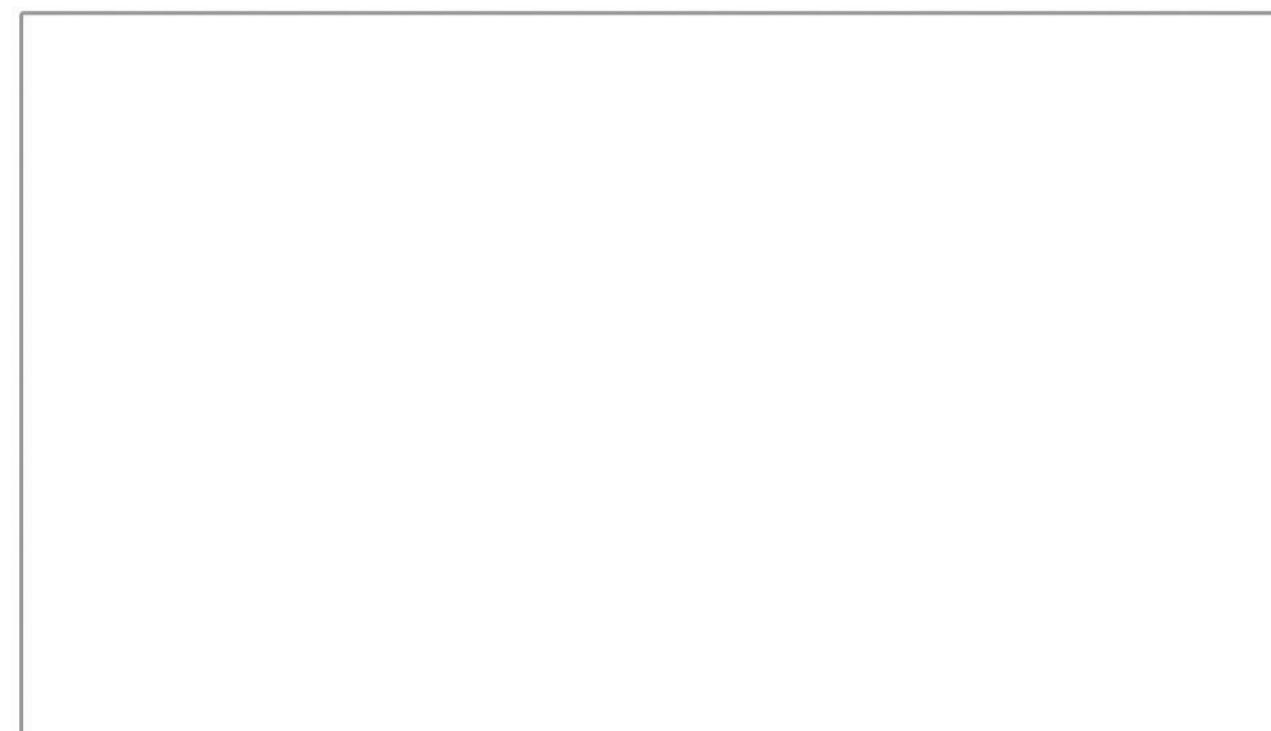

The canvas pans right to a blank portion.

...with autosave and history.

Accessible here and everywhere.

Even the void.

Thank you for your attention span.
